Bill Peach Journeys

UI Design

Bill Peach Journeys provide travel experiences to an older demographic. To make the design as accessible to their audience as possible, larger text and a high colour contrast were used for legibility. Buttons were clearly defined and a sticky header navigation would aid users without having to constantly scroll up to navigate the website.

Created together with Titan Digital.

Ricky Richards

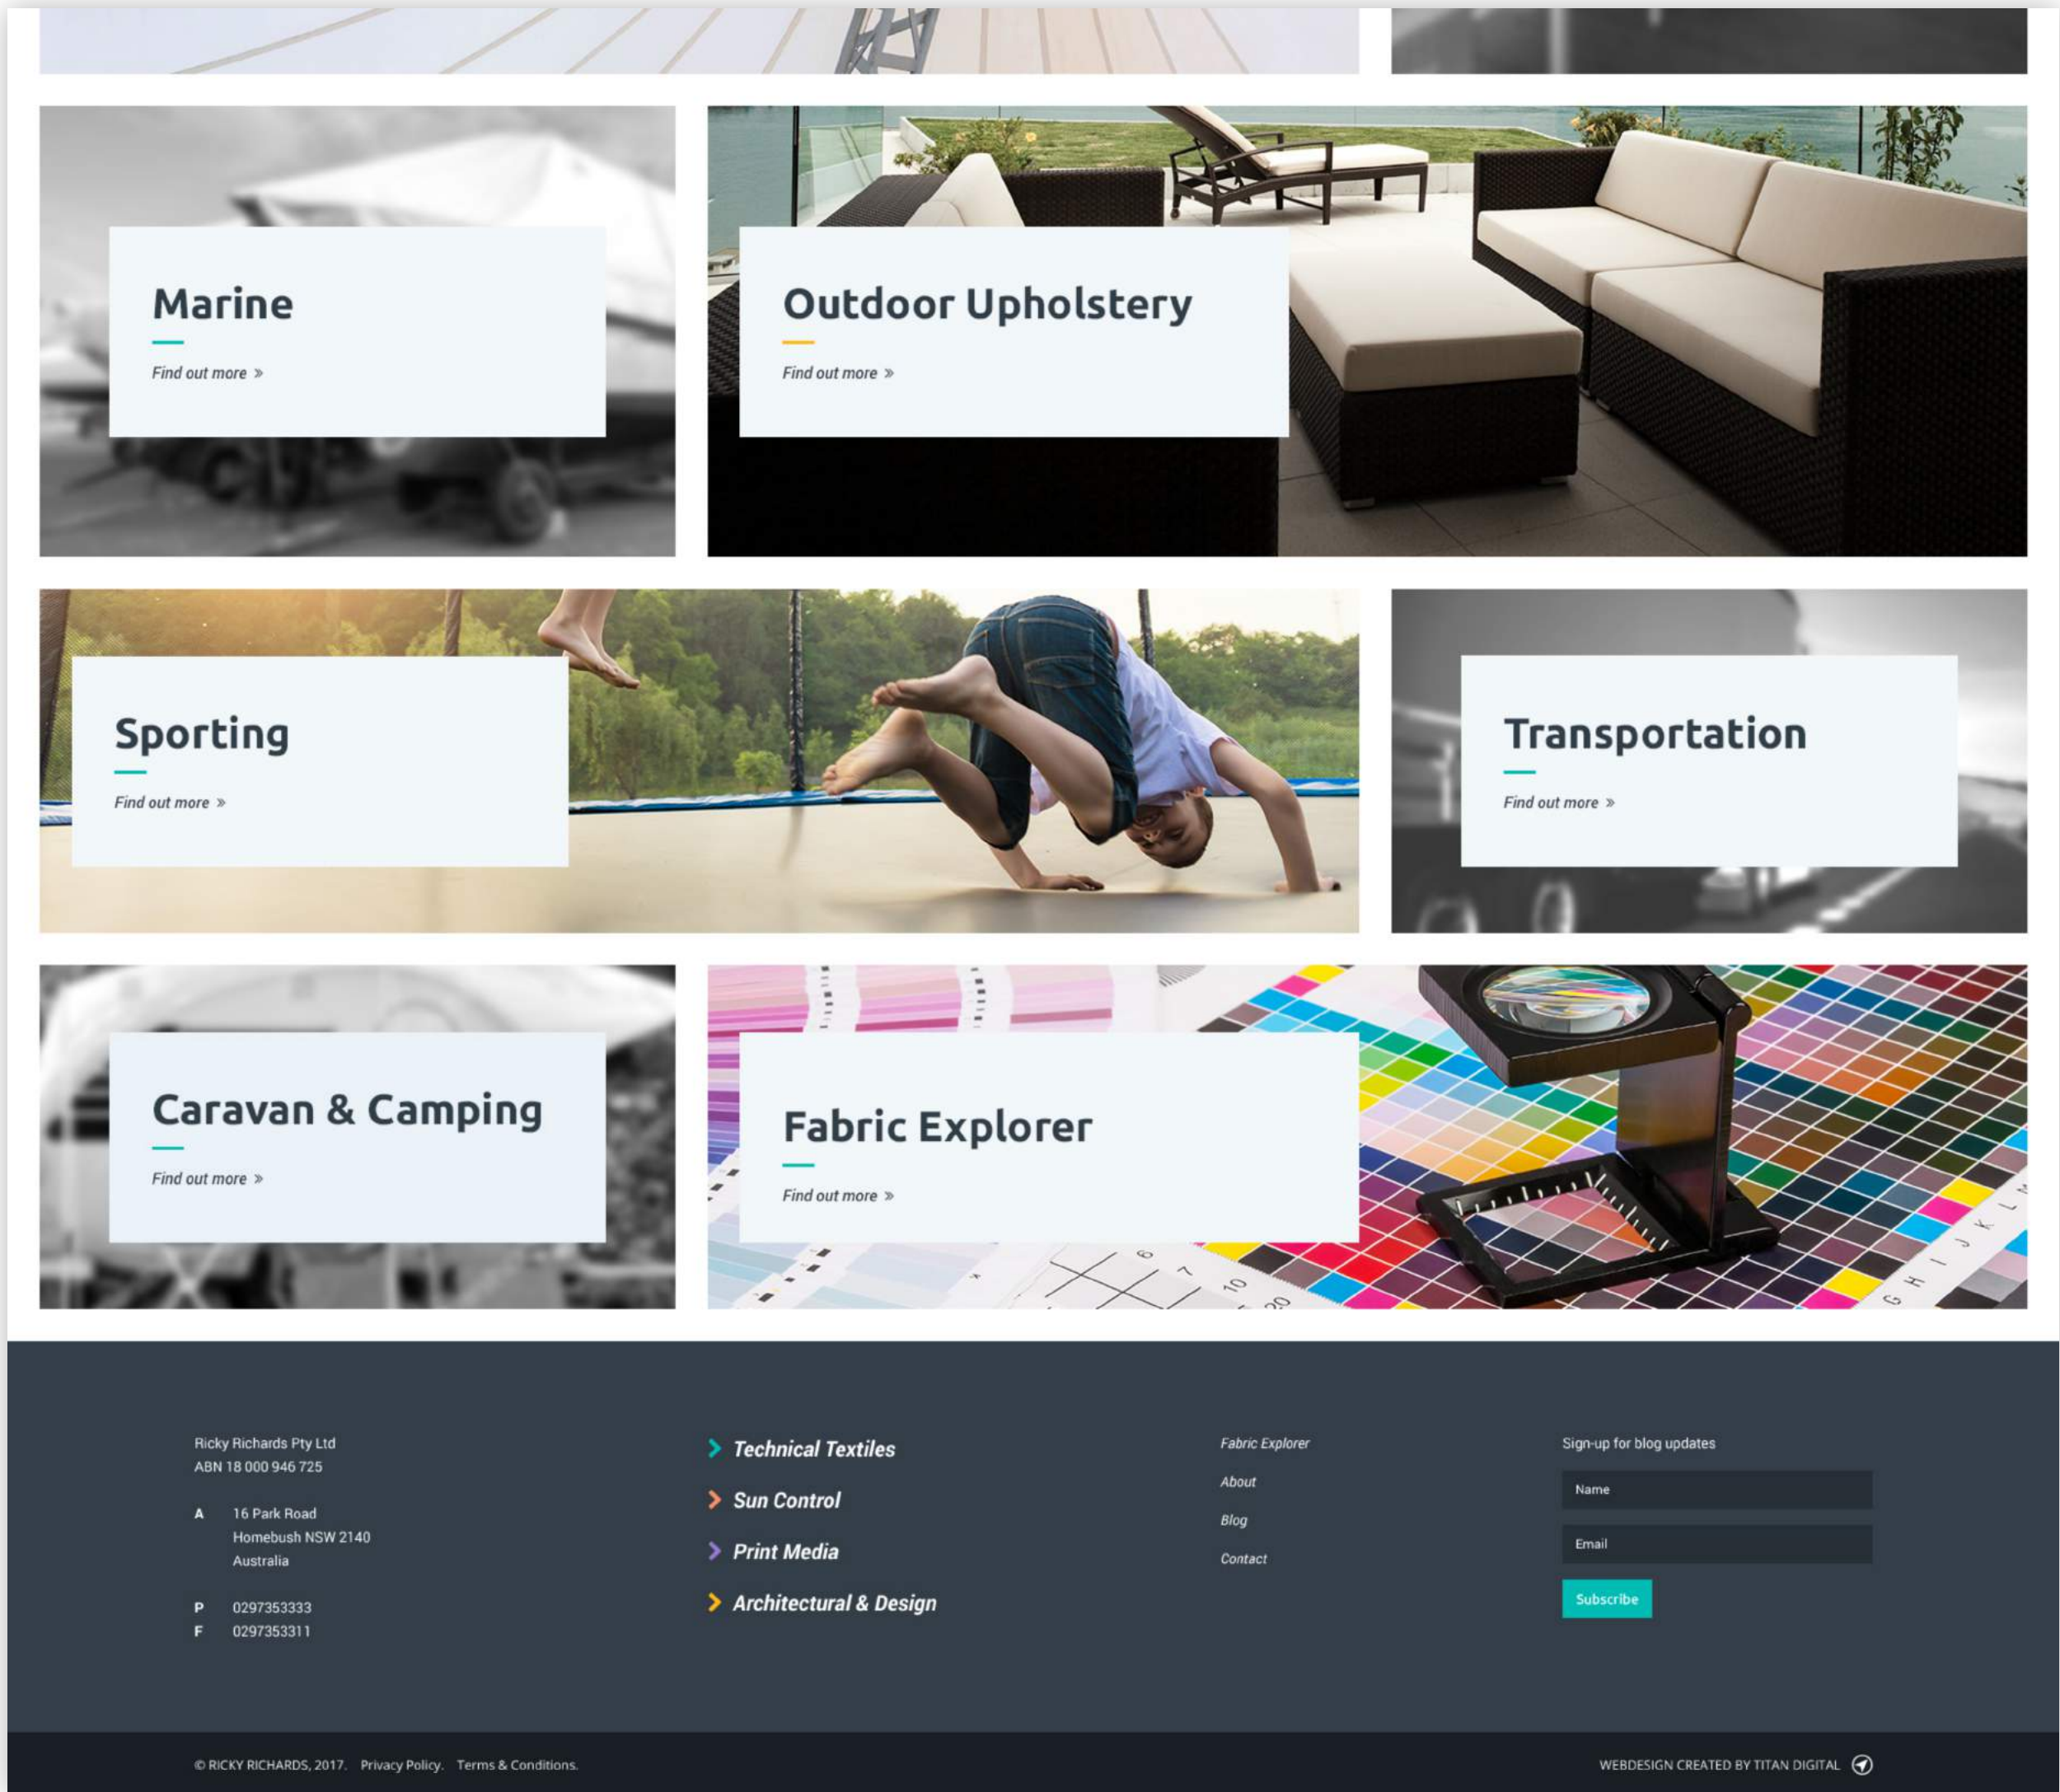

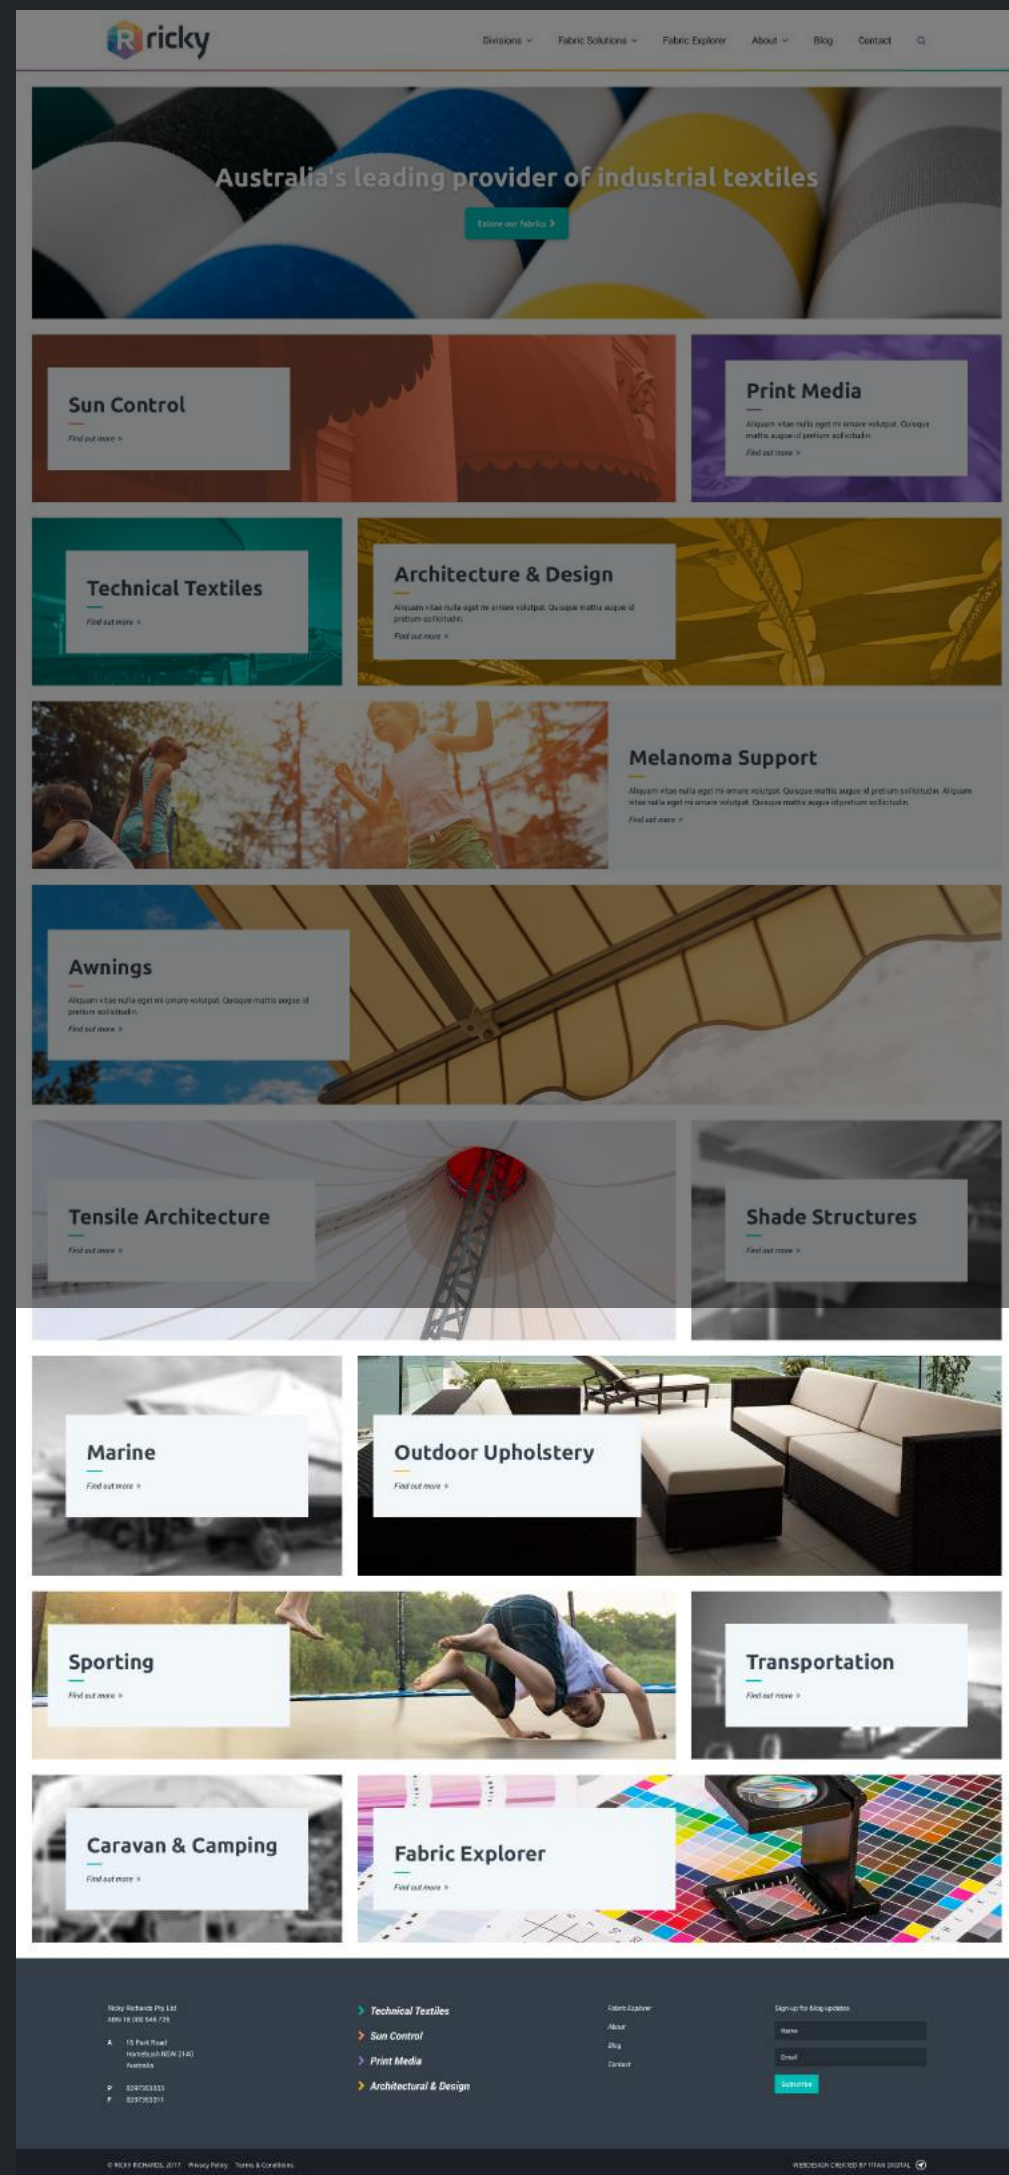

UI Design

Ricky Richards offer sun protection services via industrial textiles as well as textile print design. They have four main products which are represented via four different colours which have been used throughout the design. The products featured on the homepage are also colour coded to represent which service division they fall under. As a result the design is highly colourful while not being overwhelming to the eyes.

Created together with Titan Digital.

ANTZ COLD BREW

Antz Cold brew is sweet, smooth and delicately flavoured black coffee. How? Because it's cold-brewed!

Preparing Antz Cold Brew involves roasting and grinding FRESH Colombian Jacoba beans. These beans make smooth and delicious coffee with flavours of blueberry, mint and a cocoa finish.

Antz Cold Brew tastes great over ice, ice-cream, with added milk, sugar or syrup.

LA JACOBA

La Jacoba is chemical free and carefully produced to ensure a low environmental impact. These beans are grown in harmony with nature and supplied sustainably. Tasty, clean and socially responsible coffee beans!

We soak La Jacoba coffee grinds in filtered, pure water which we then leave to 'brew' for an extensive period. Once the flavour has reached its full potential the brew is filtered to give a clean and refreshing finish. The finished product is satin-soft, naturally sweet and fruity black coffee. However, it has all the caffeine perks of a strong, hot coffee.

DO YOU WANT TO STOCK COLD BREW IN YOUR HOME OR BUSINESS?

Pellentesque faucibus sollicitudin lacus ut dignissim. Quisque lobortis commodo eros, ac varius enim vehicula nec!

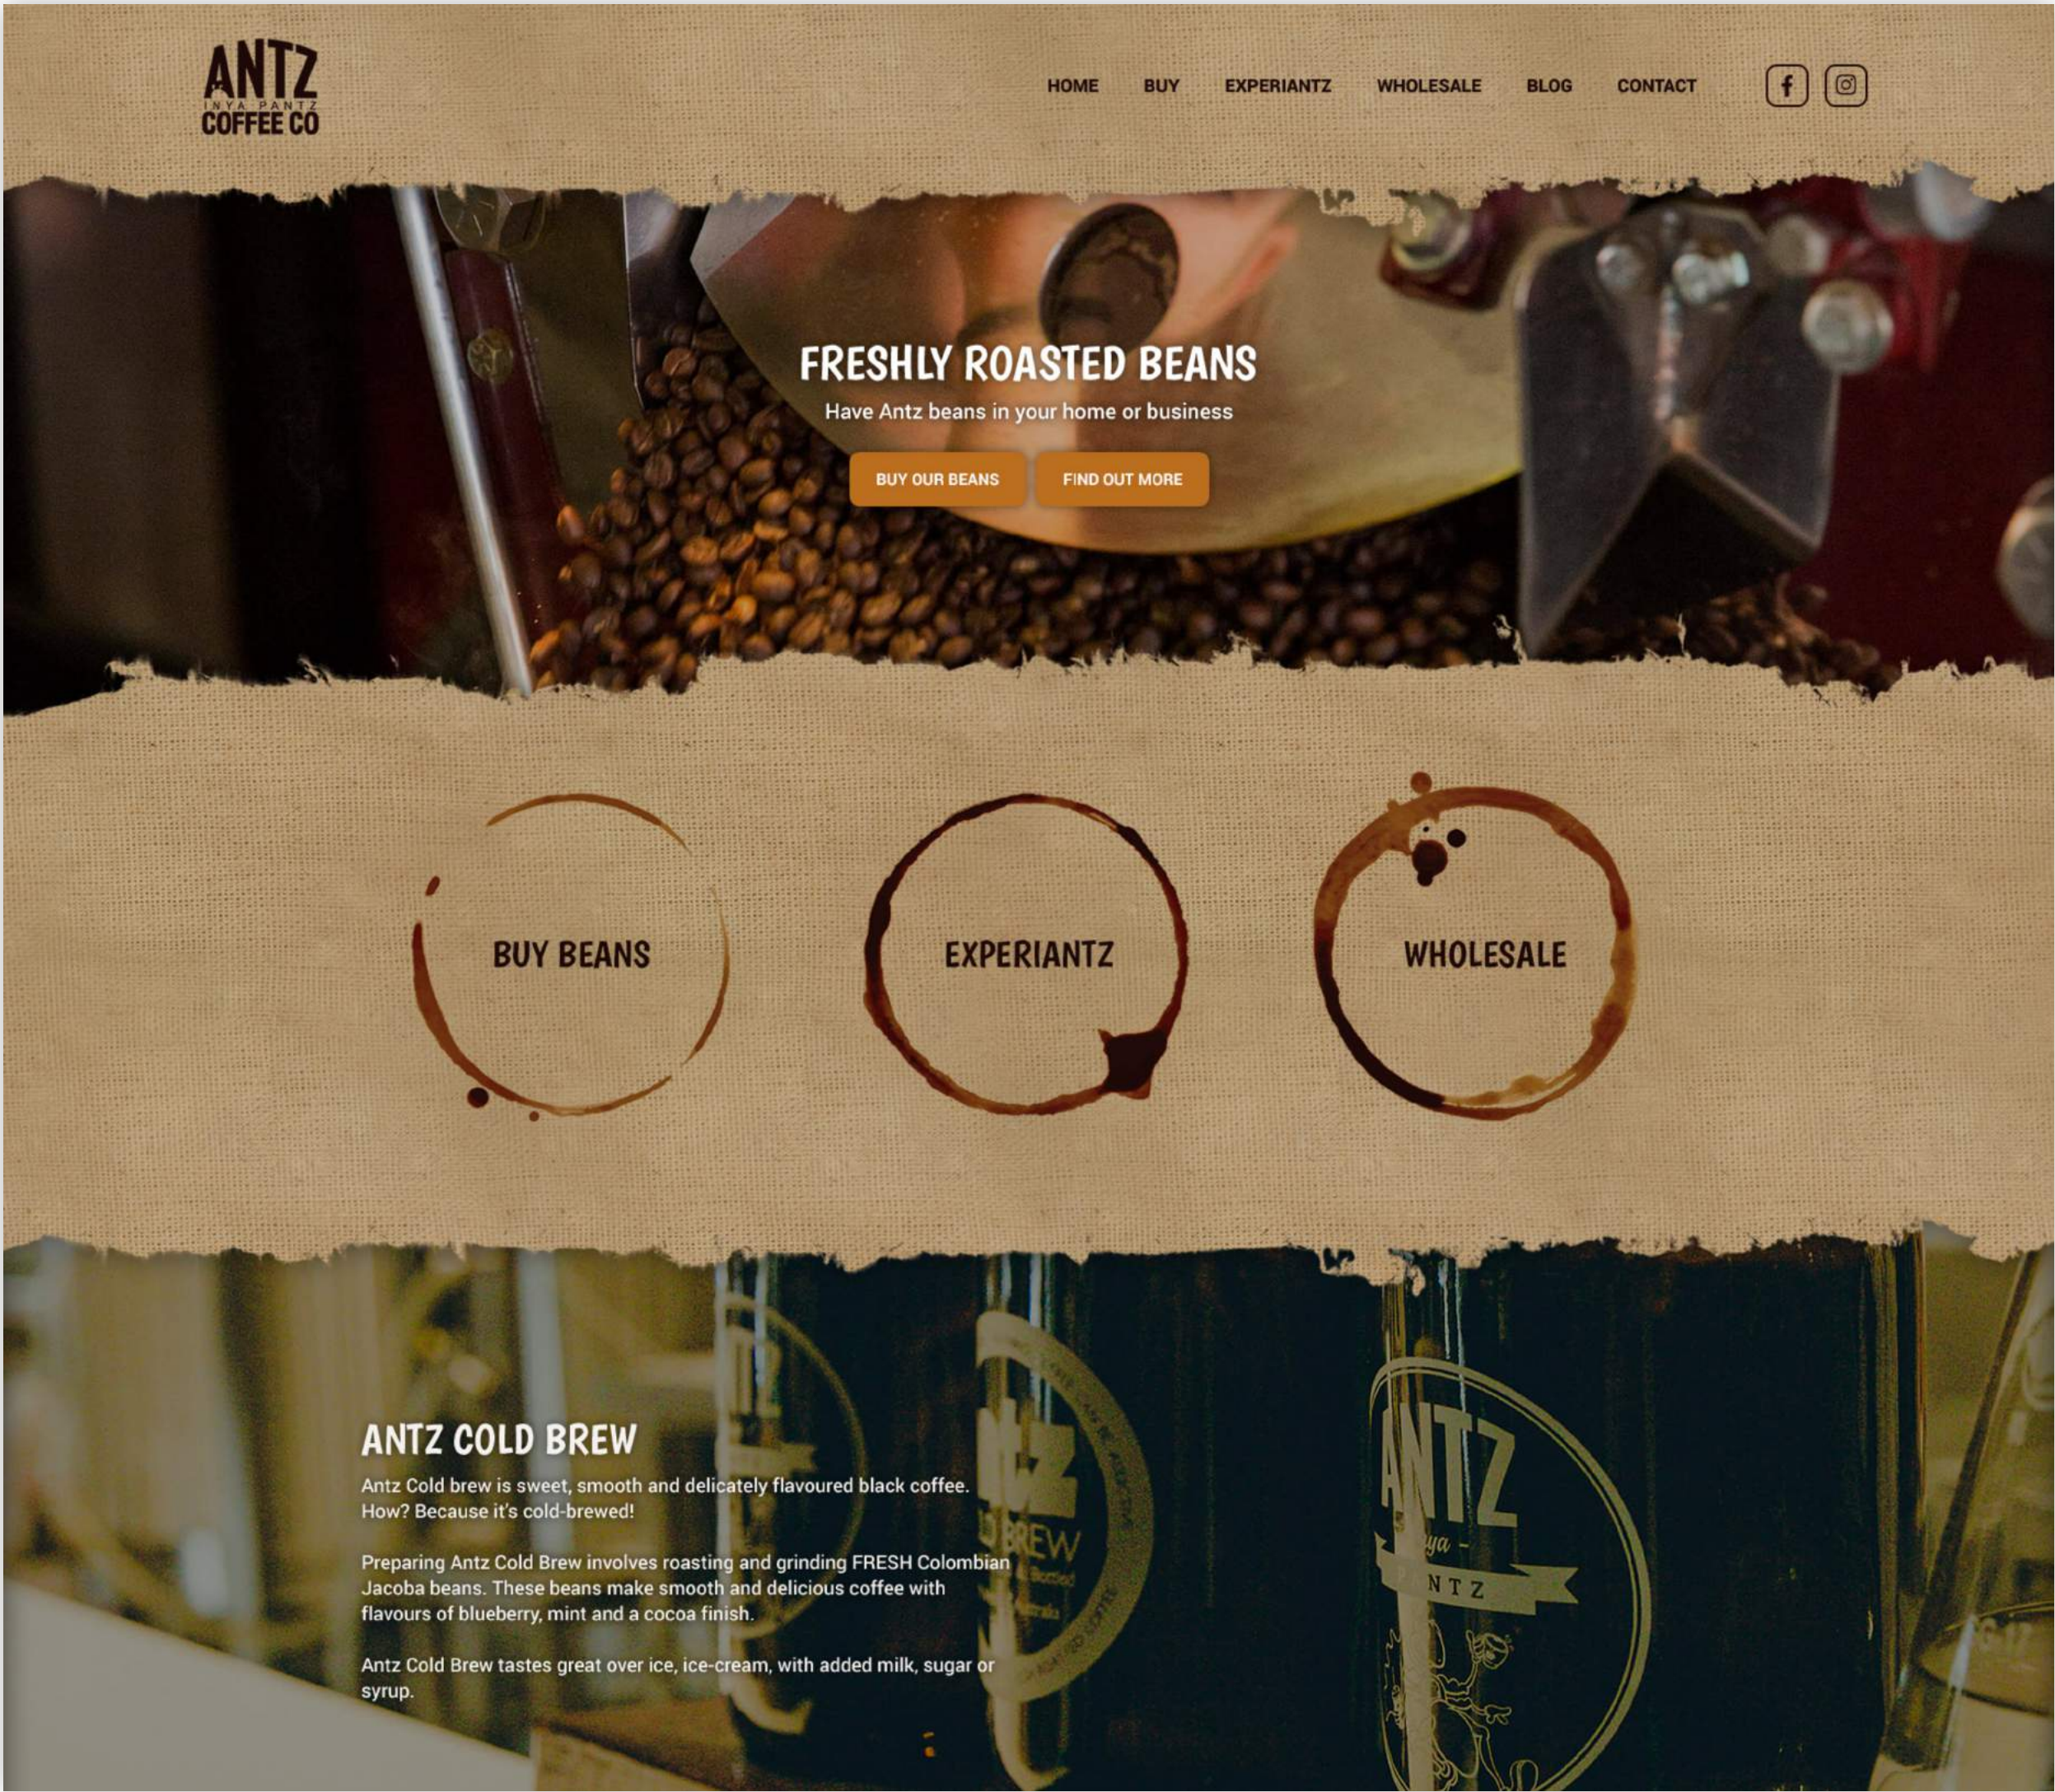

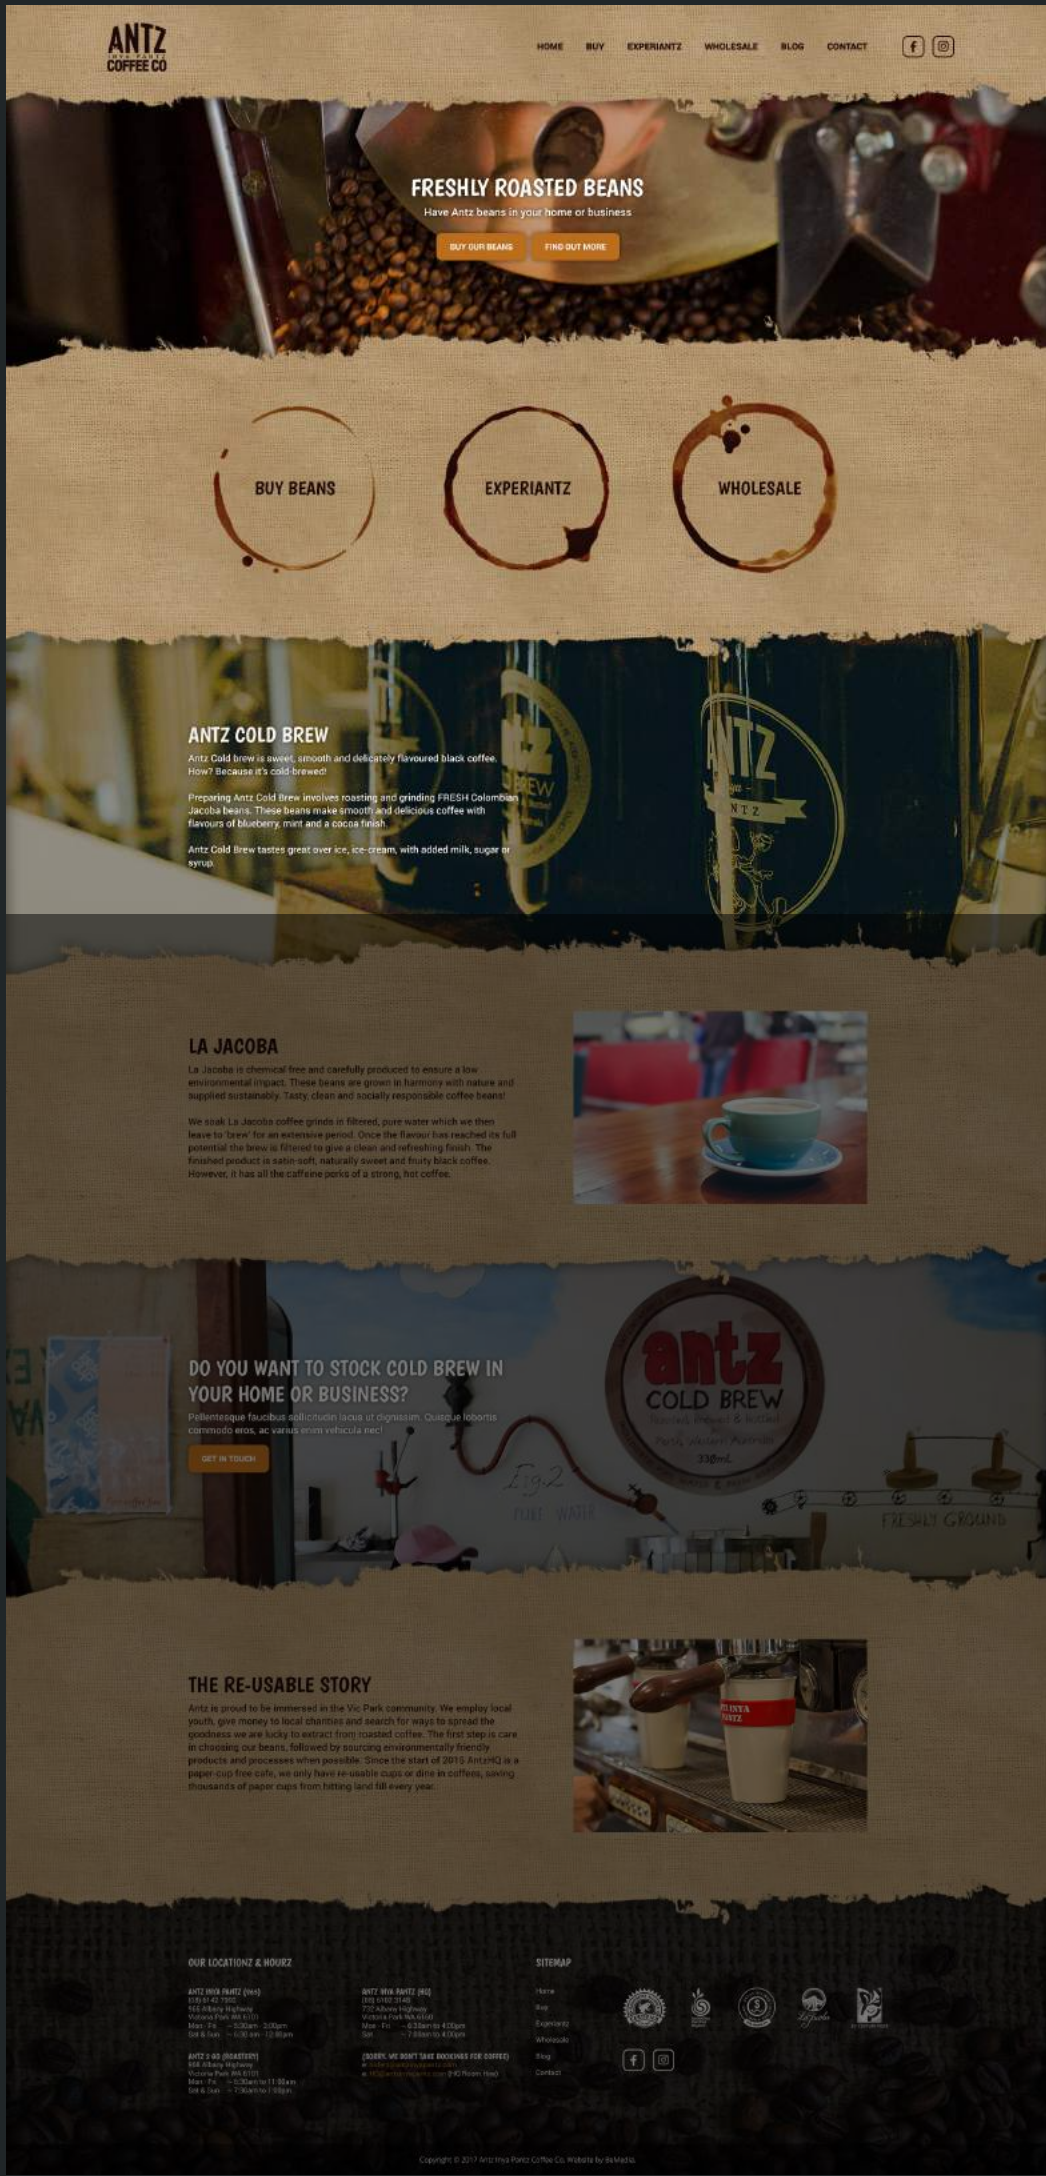

GET IN TOUCH

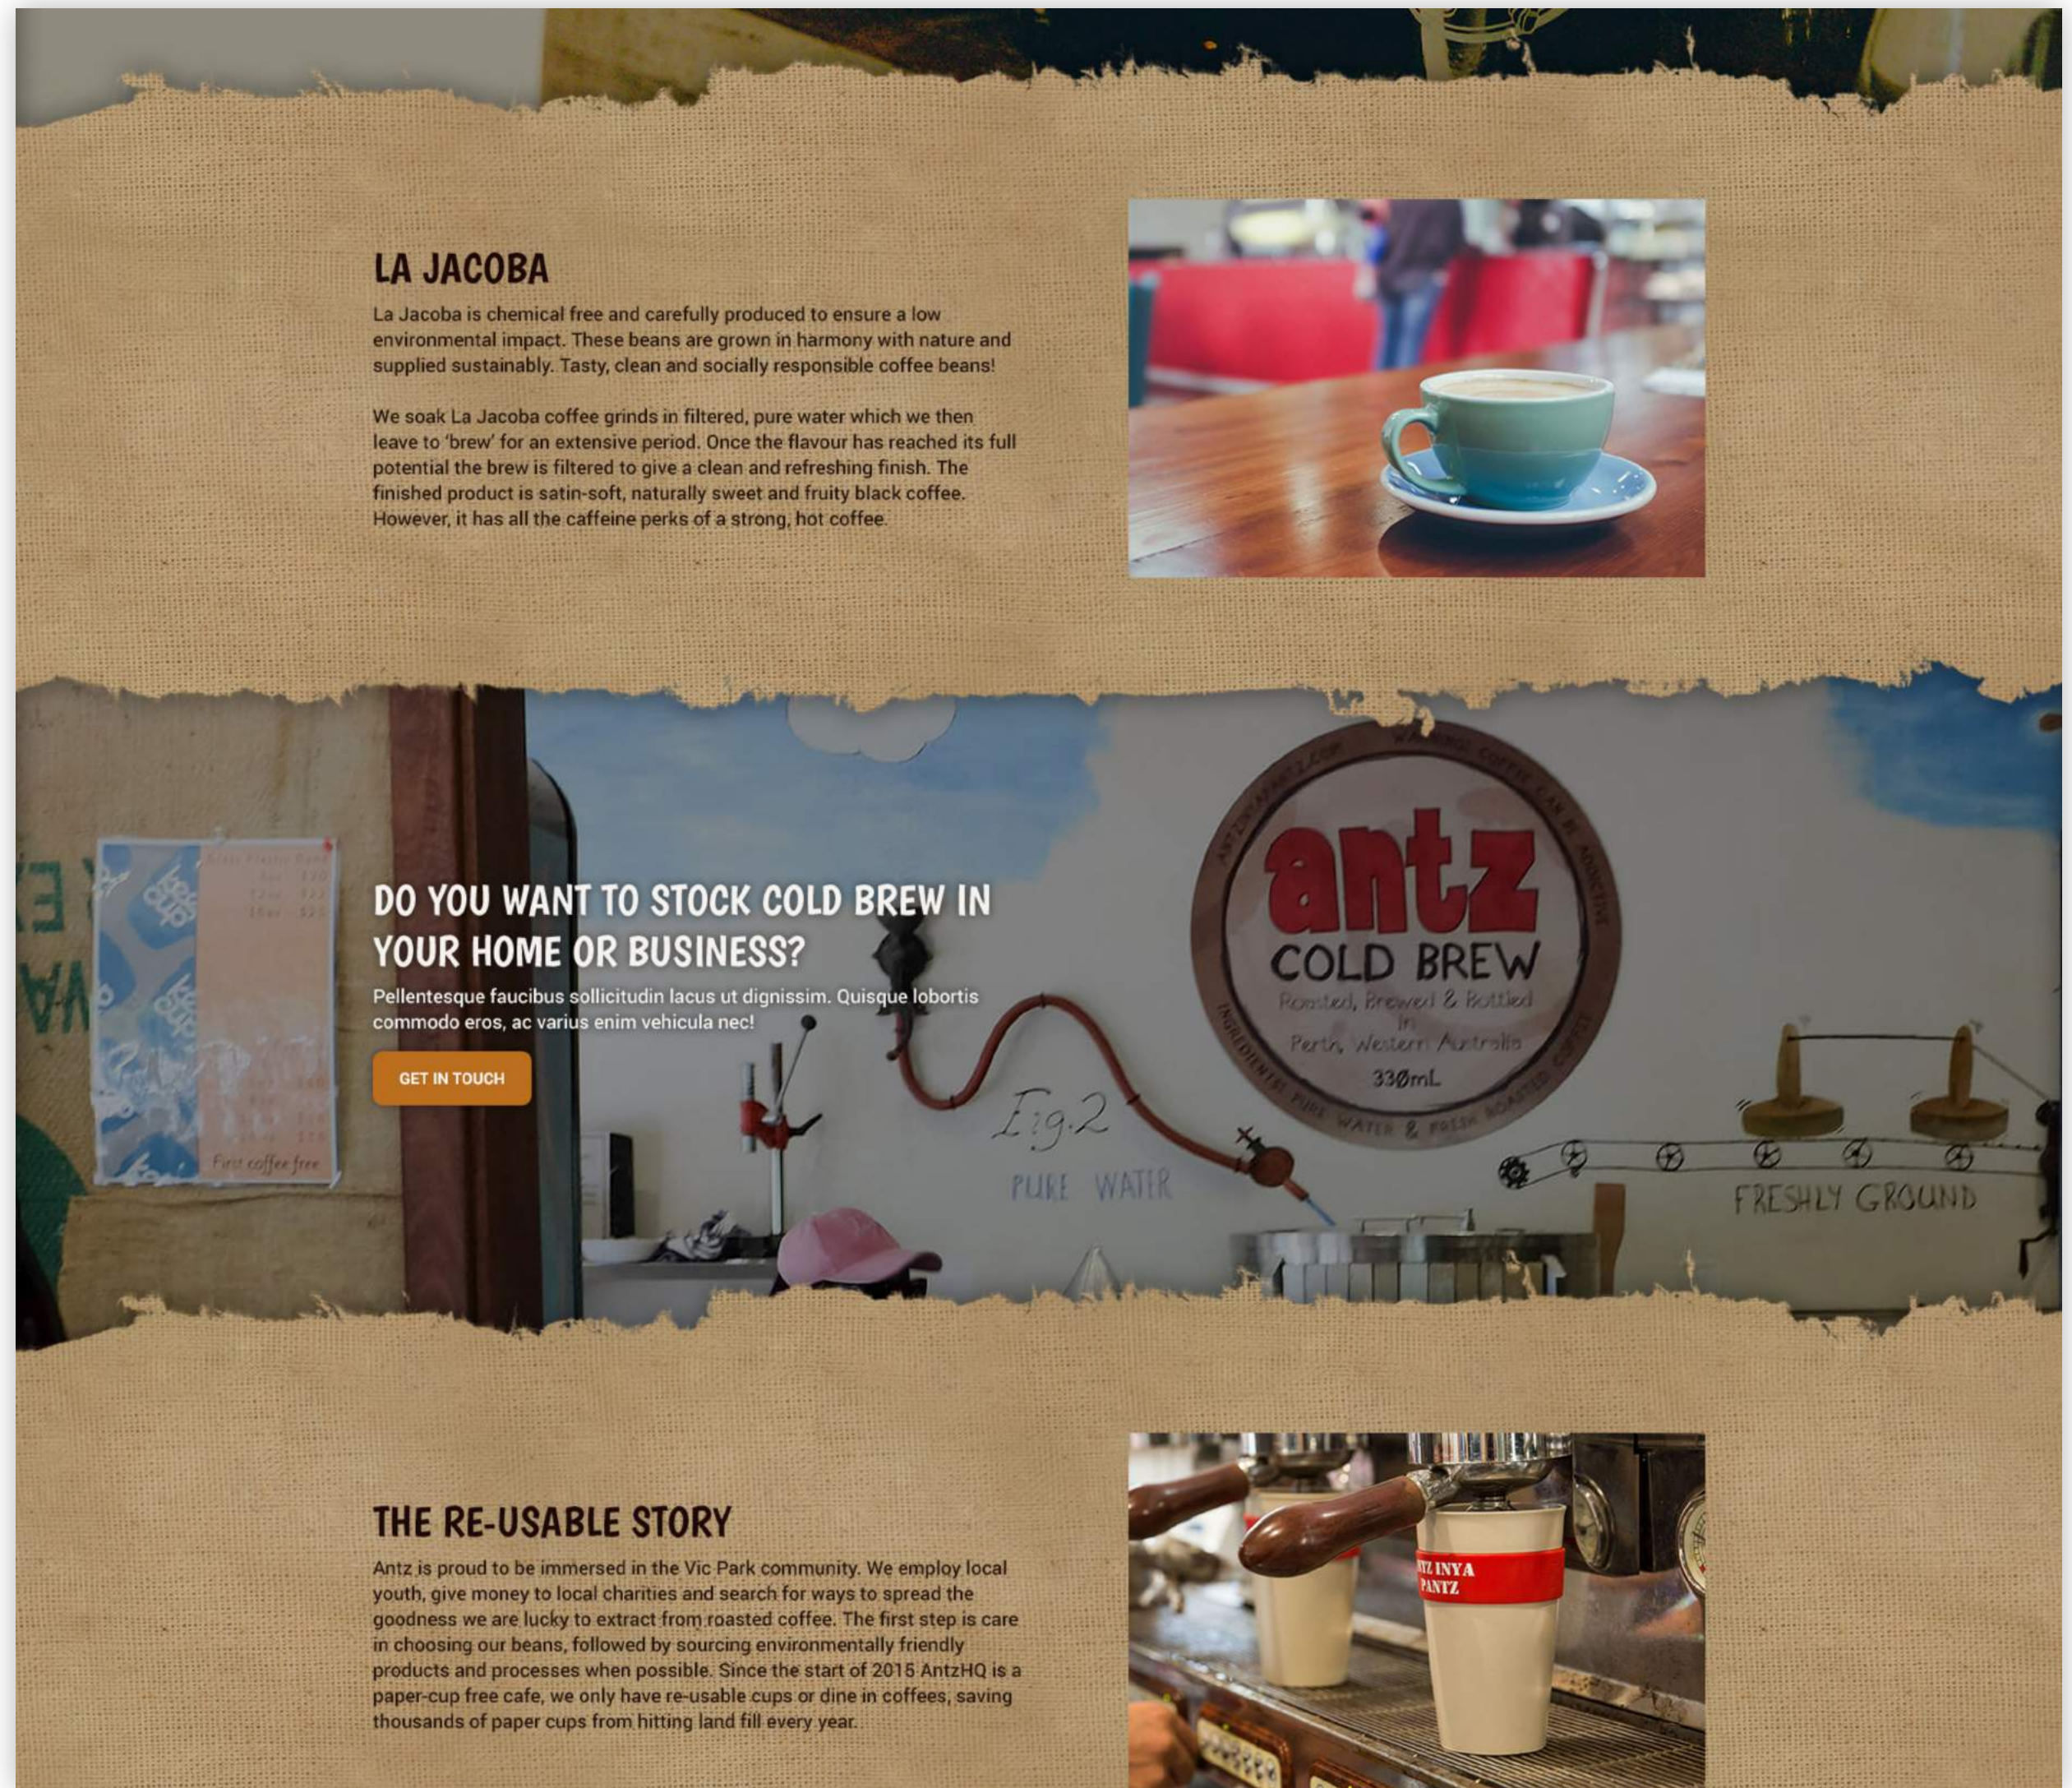

Antz Inya Pantz

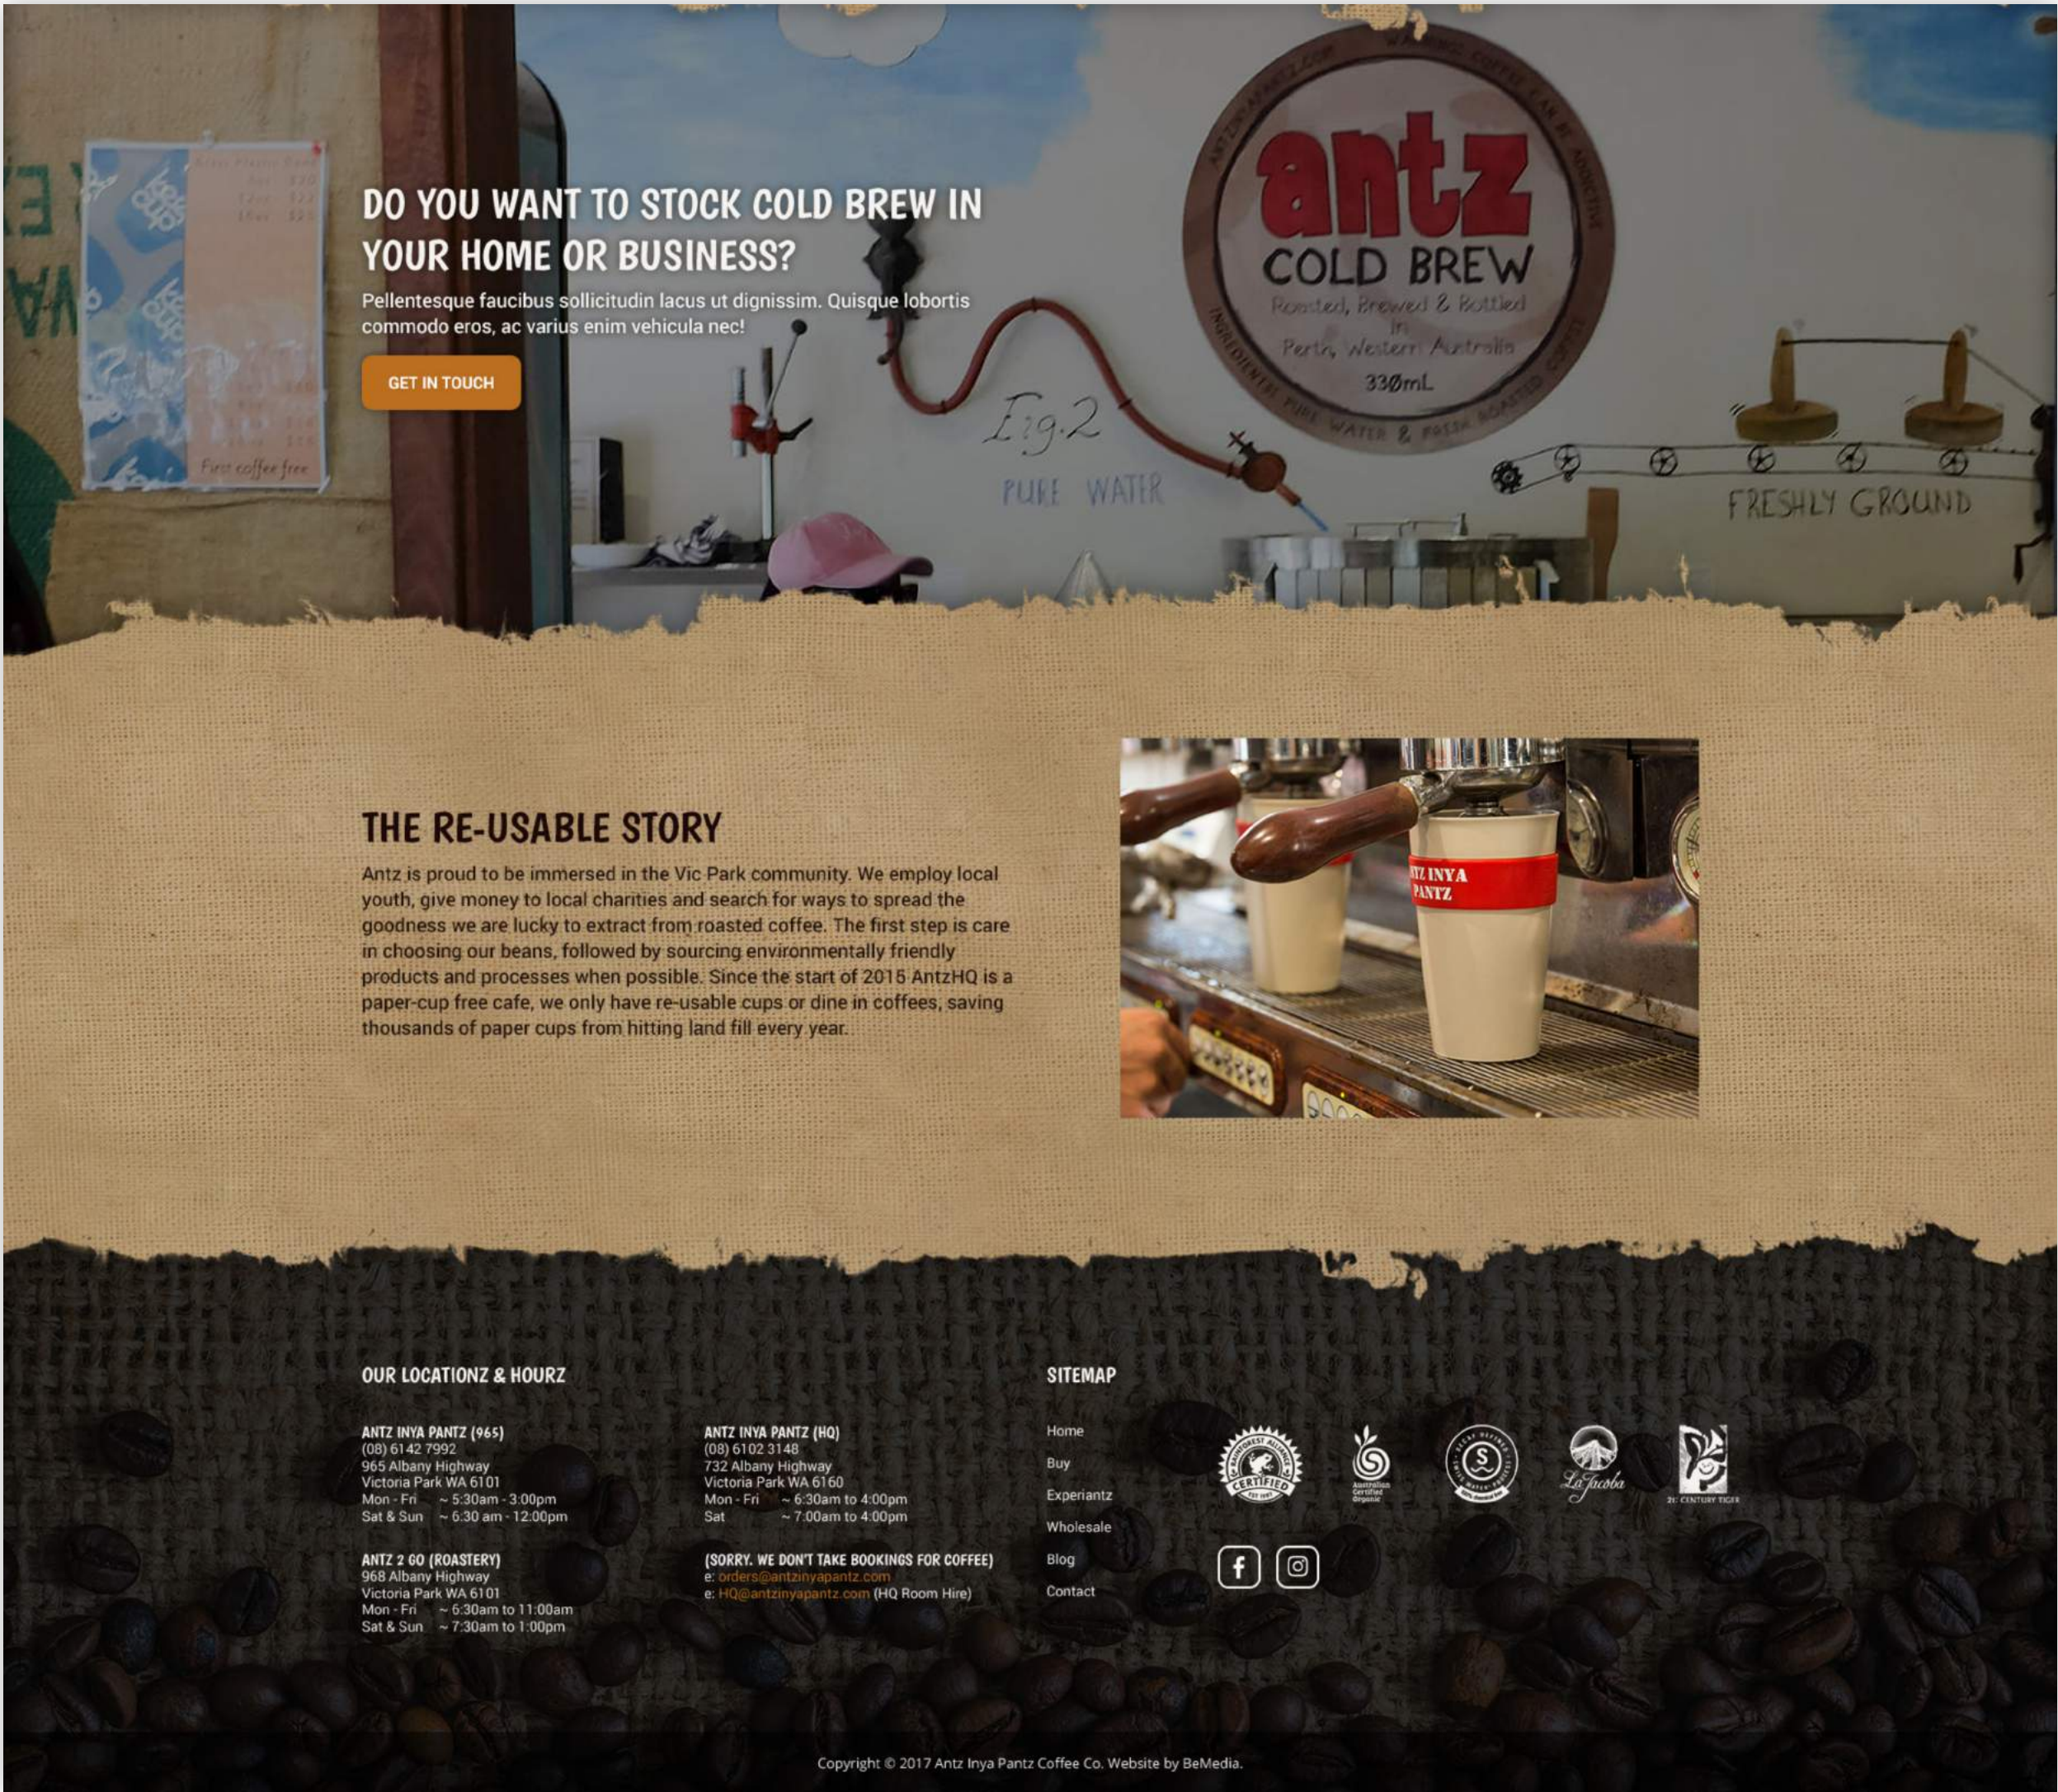

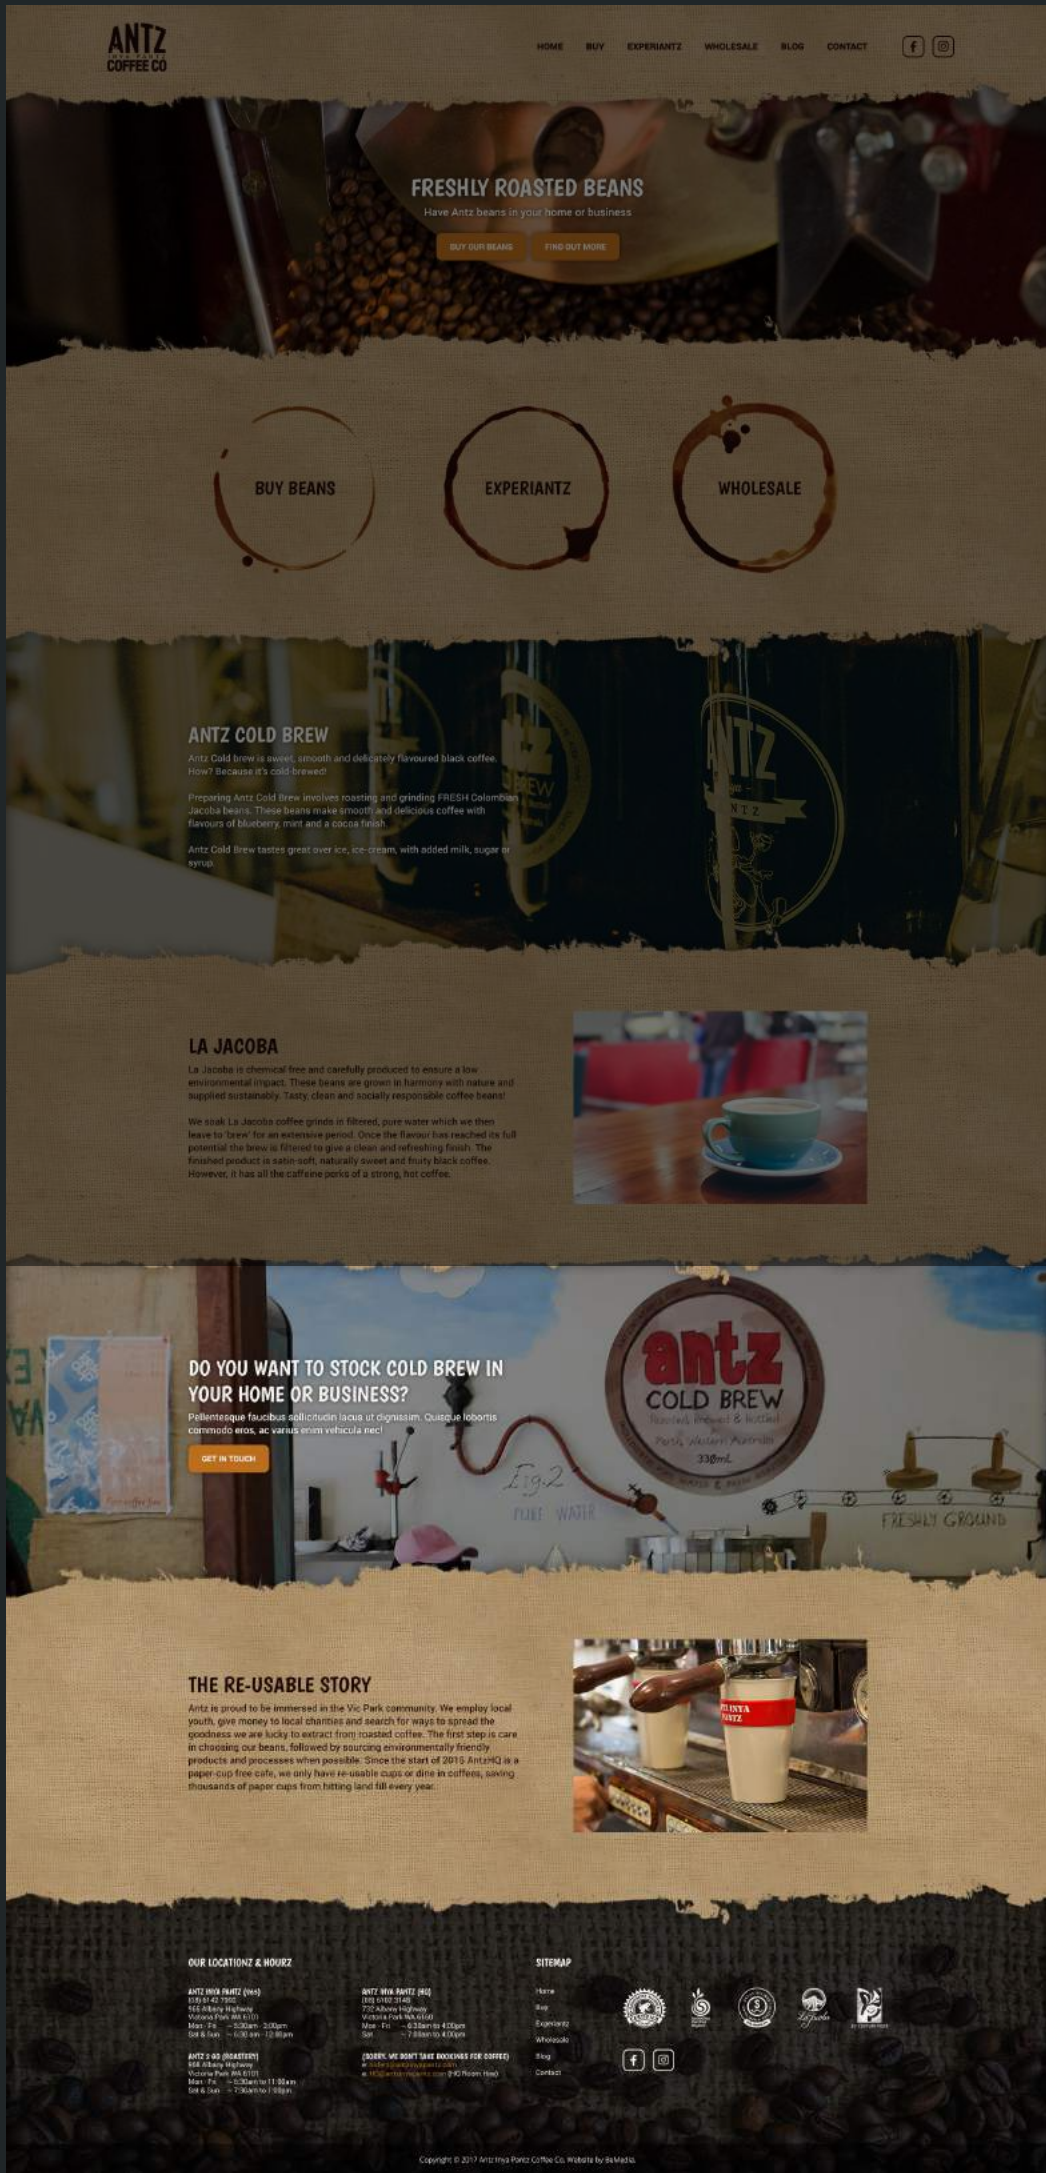

UI Design

Antz Inya Pantz are a quirky coffee roasting house serving quality caffeinated drinks and freshly roasted coffee beans. Their fun and quirky atmosphere was replicated in the design as well as incorporating various coffeehouse visual elements, such as coffee stains and hessian coffee bag textures.

Myree Ceramics

UI Design

Myaree Ceramics offer exclusive designer tiles and required a new website to match their bespoke products. Care was taken to ensure their best photographs were used to properly portray their designer tiles. The design is clean with a large focus on imagery to help showcase their products.

DGA Windows

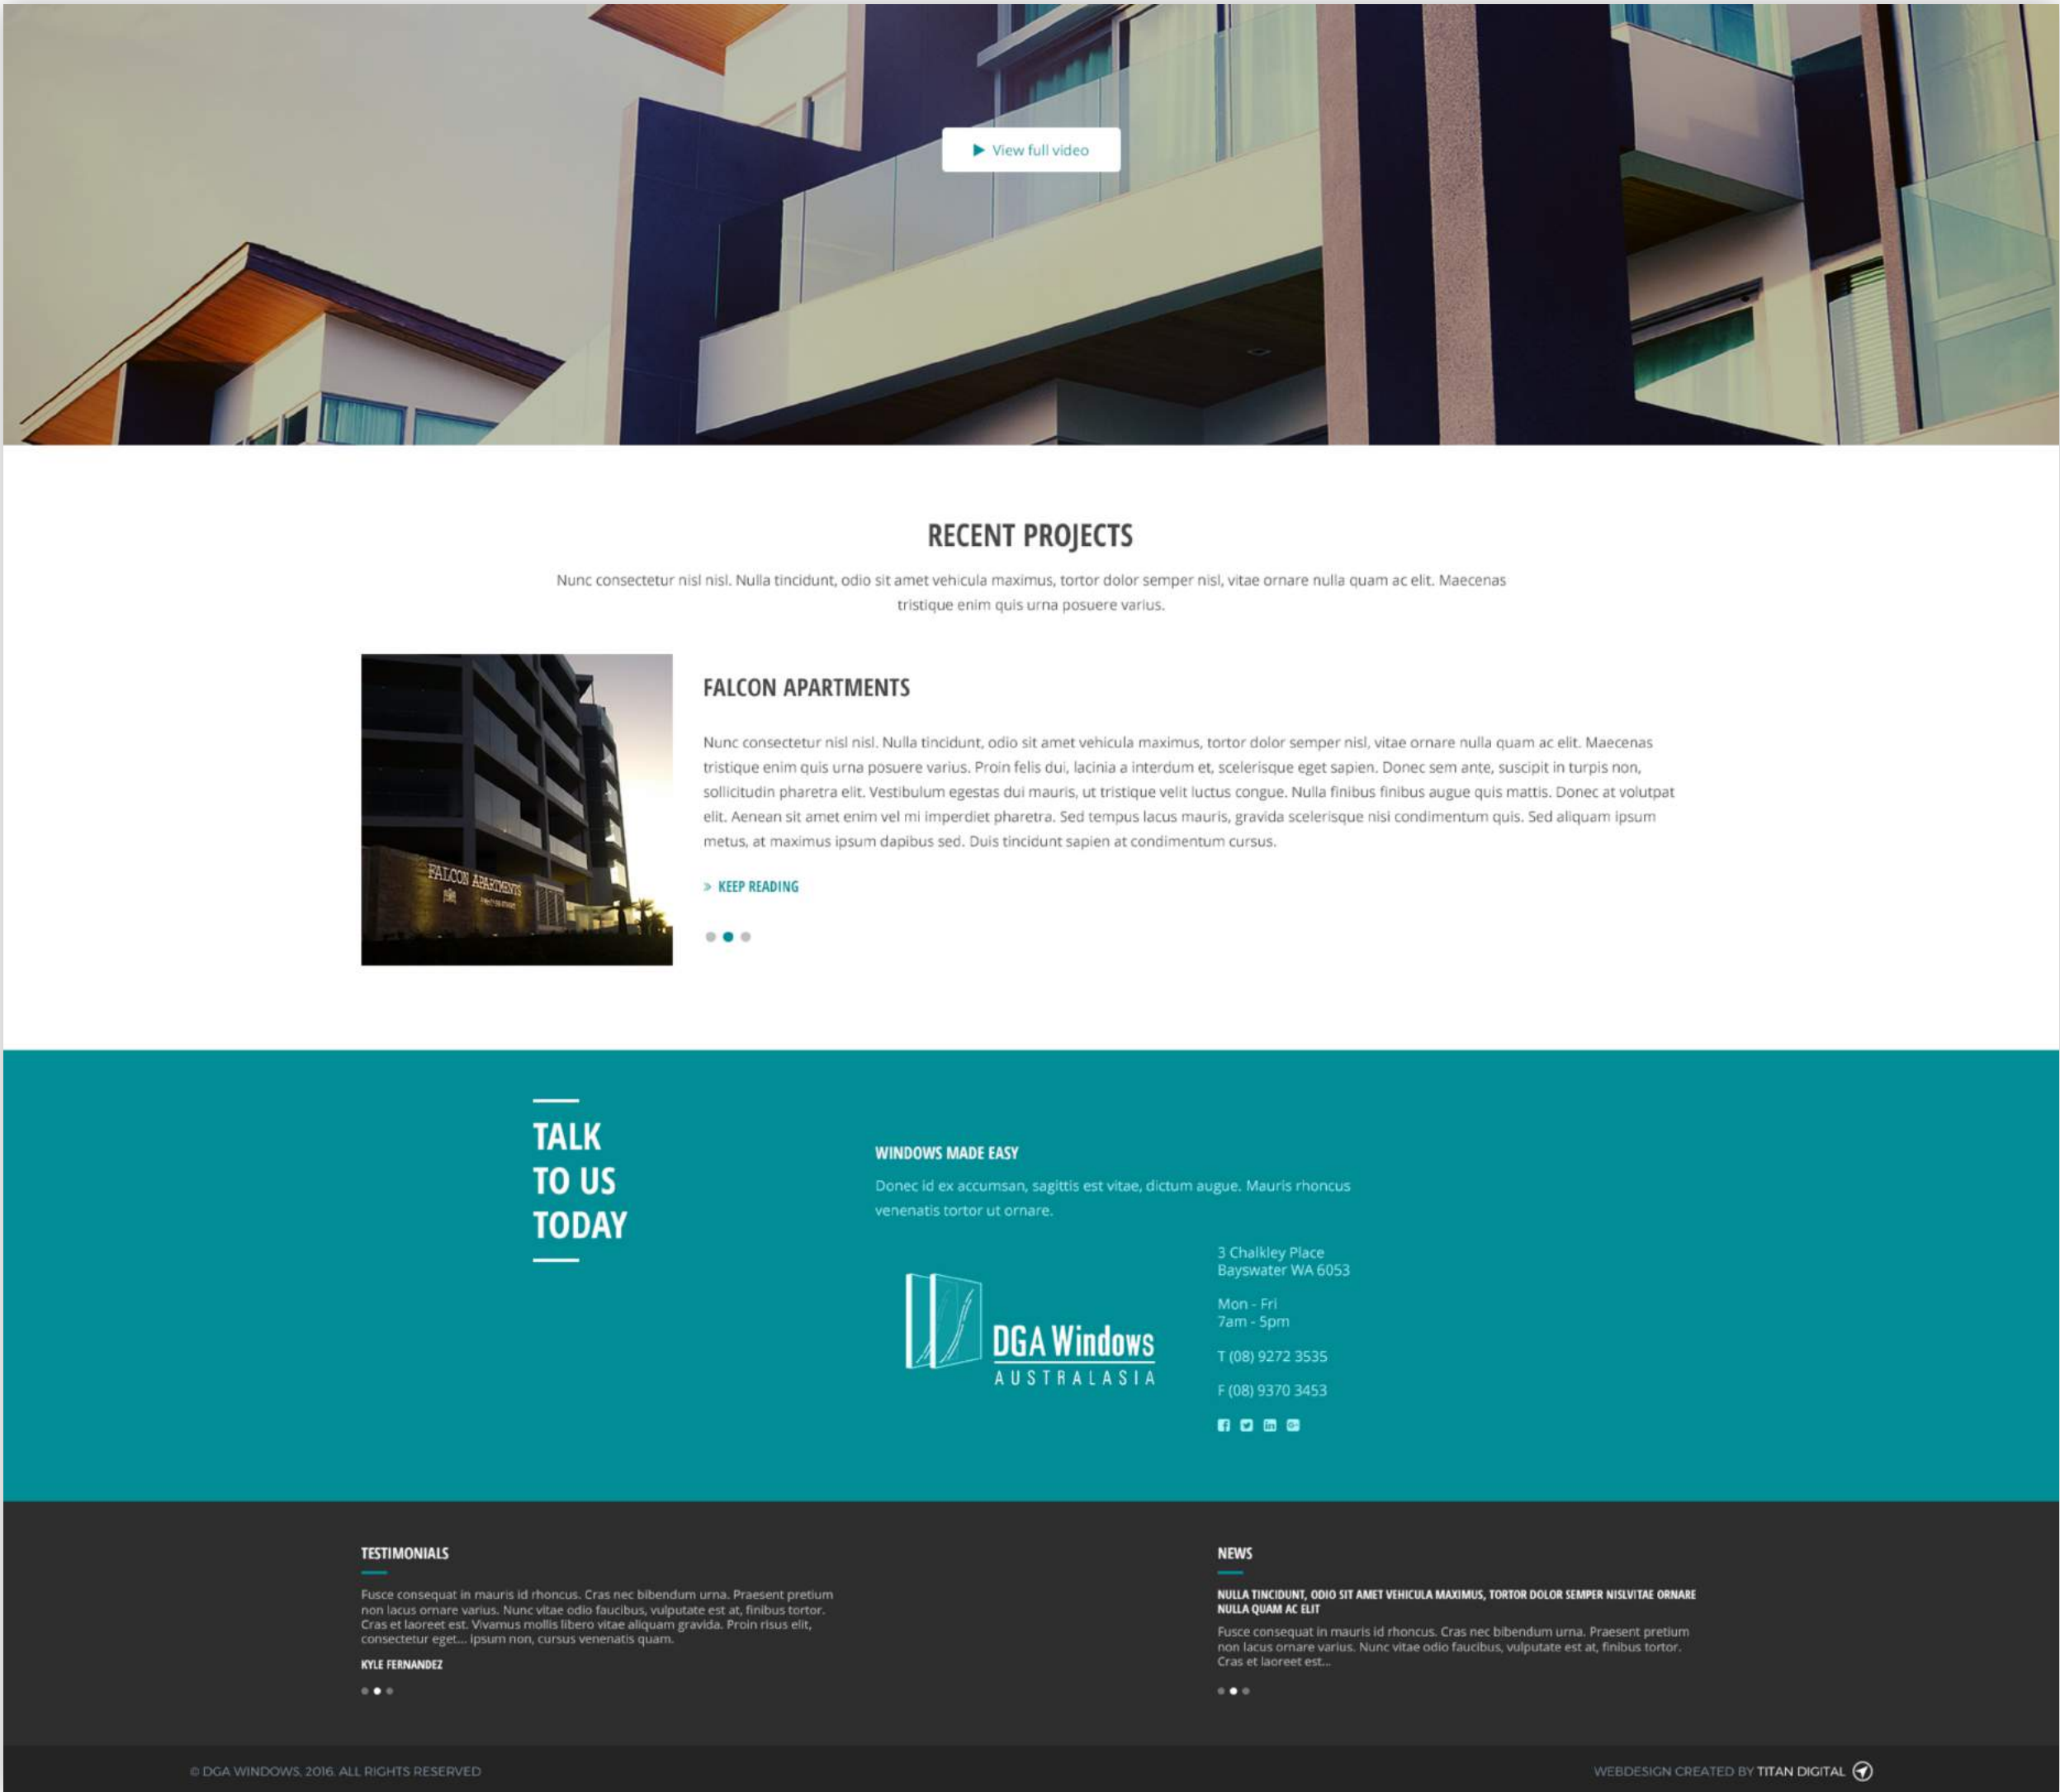

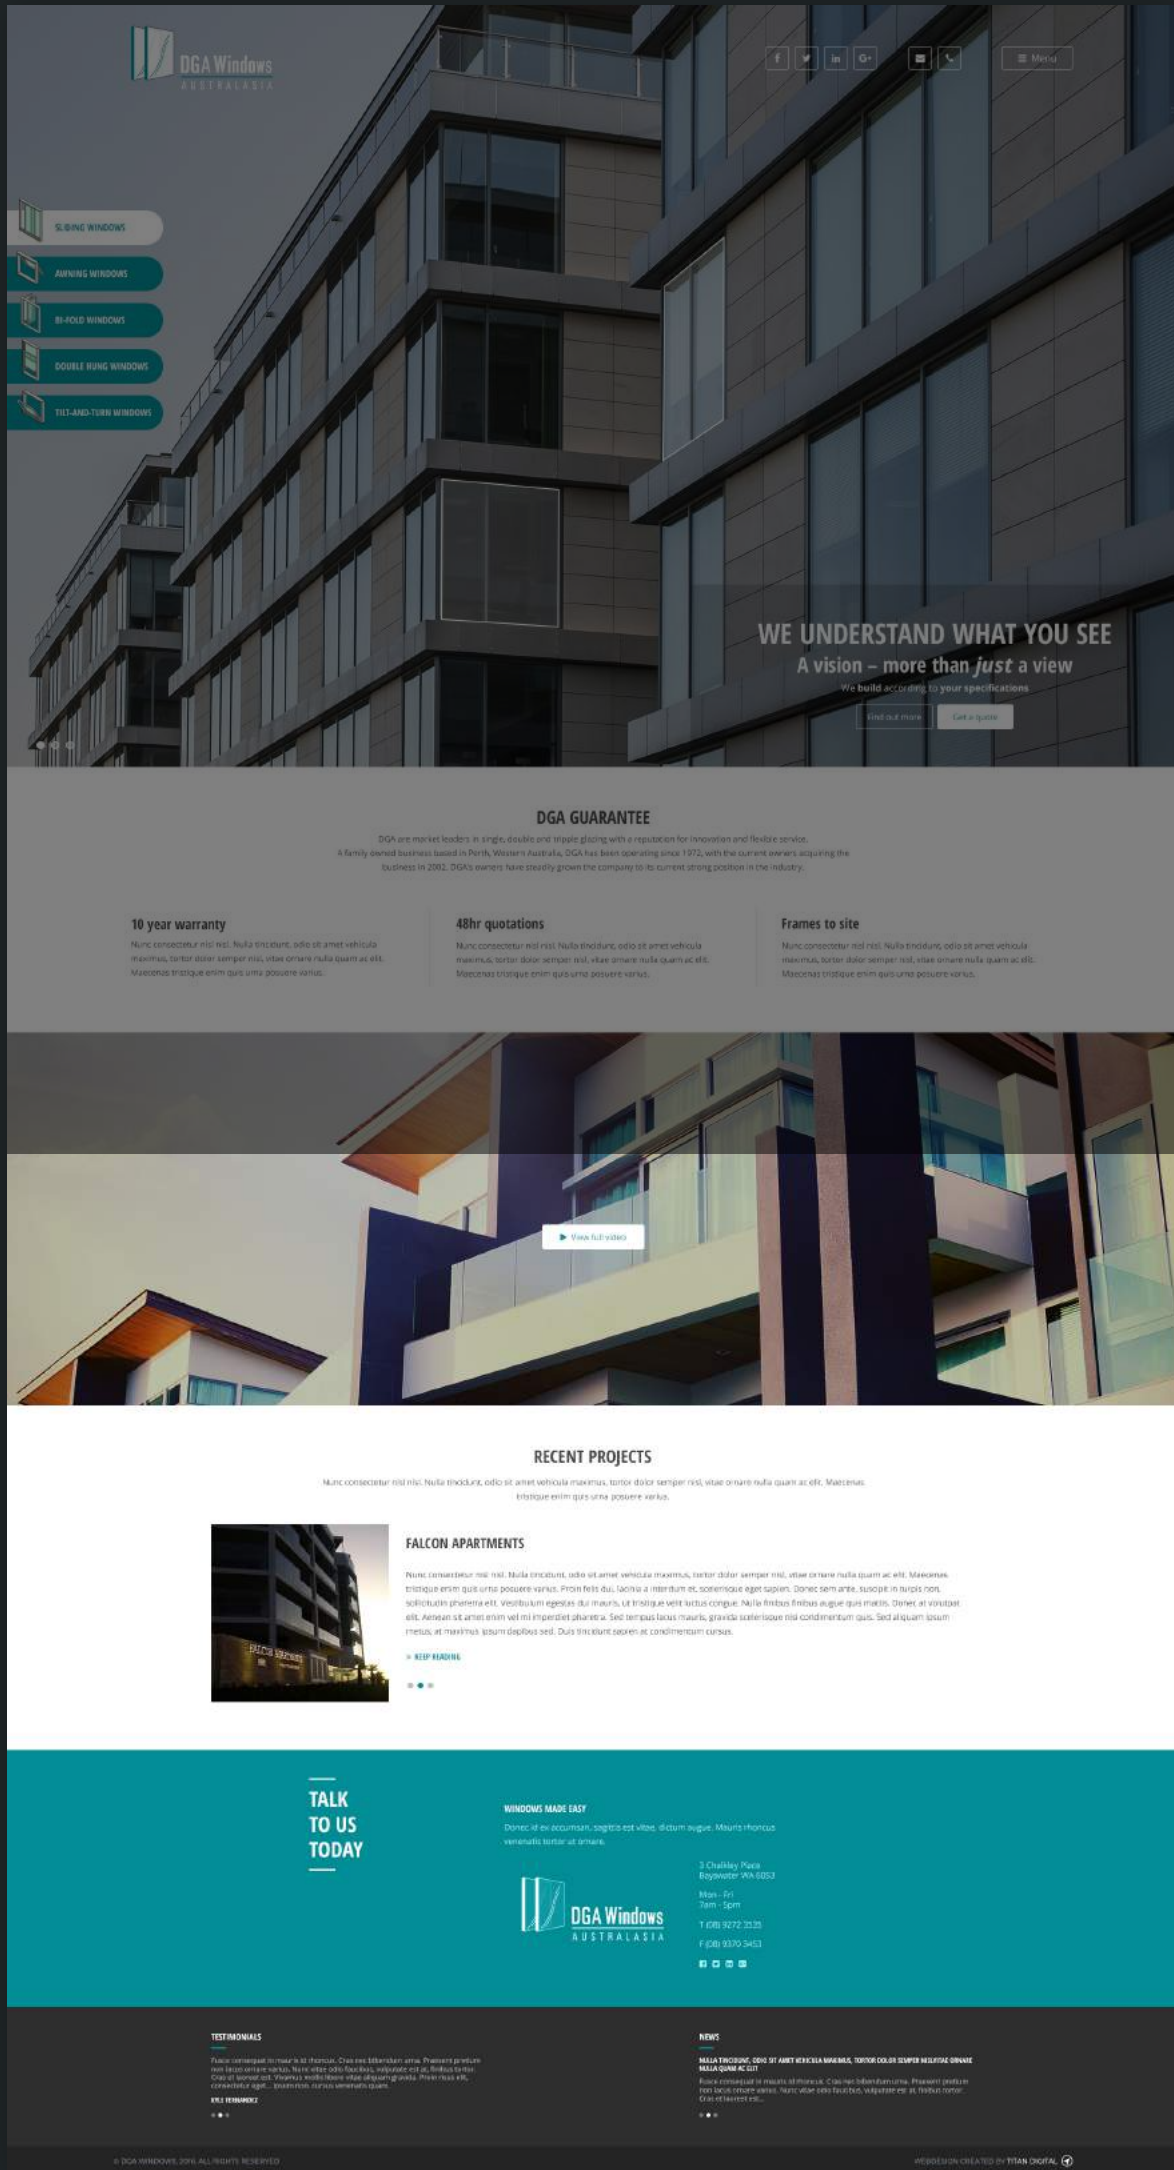

UI Design

DGA Windows required a new and modern look to their website. Hotspots on the banner images (outlined in white) would reveal information about the products DGA use when manufacturing their glass panels. As their clientele include homeowners and commercial buildings the imagery chosen would display the building while also focussing on the glass windows.

MESSAGE *

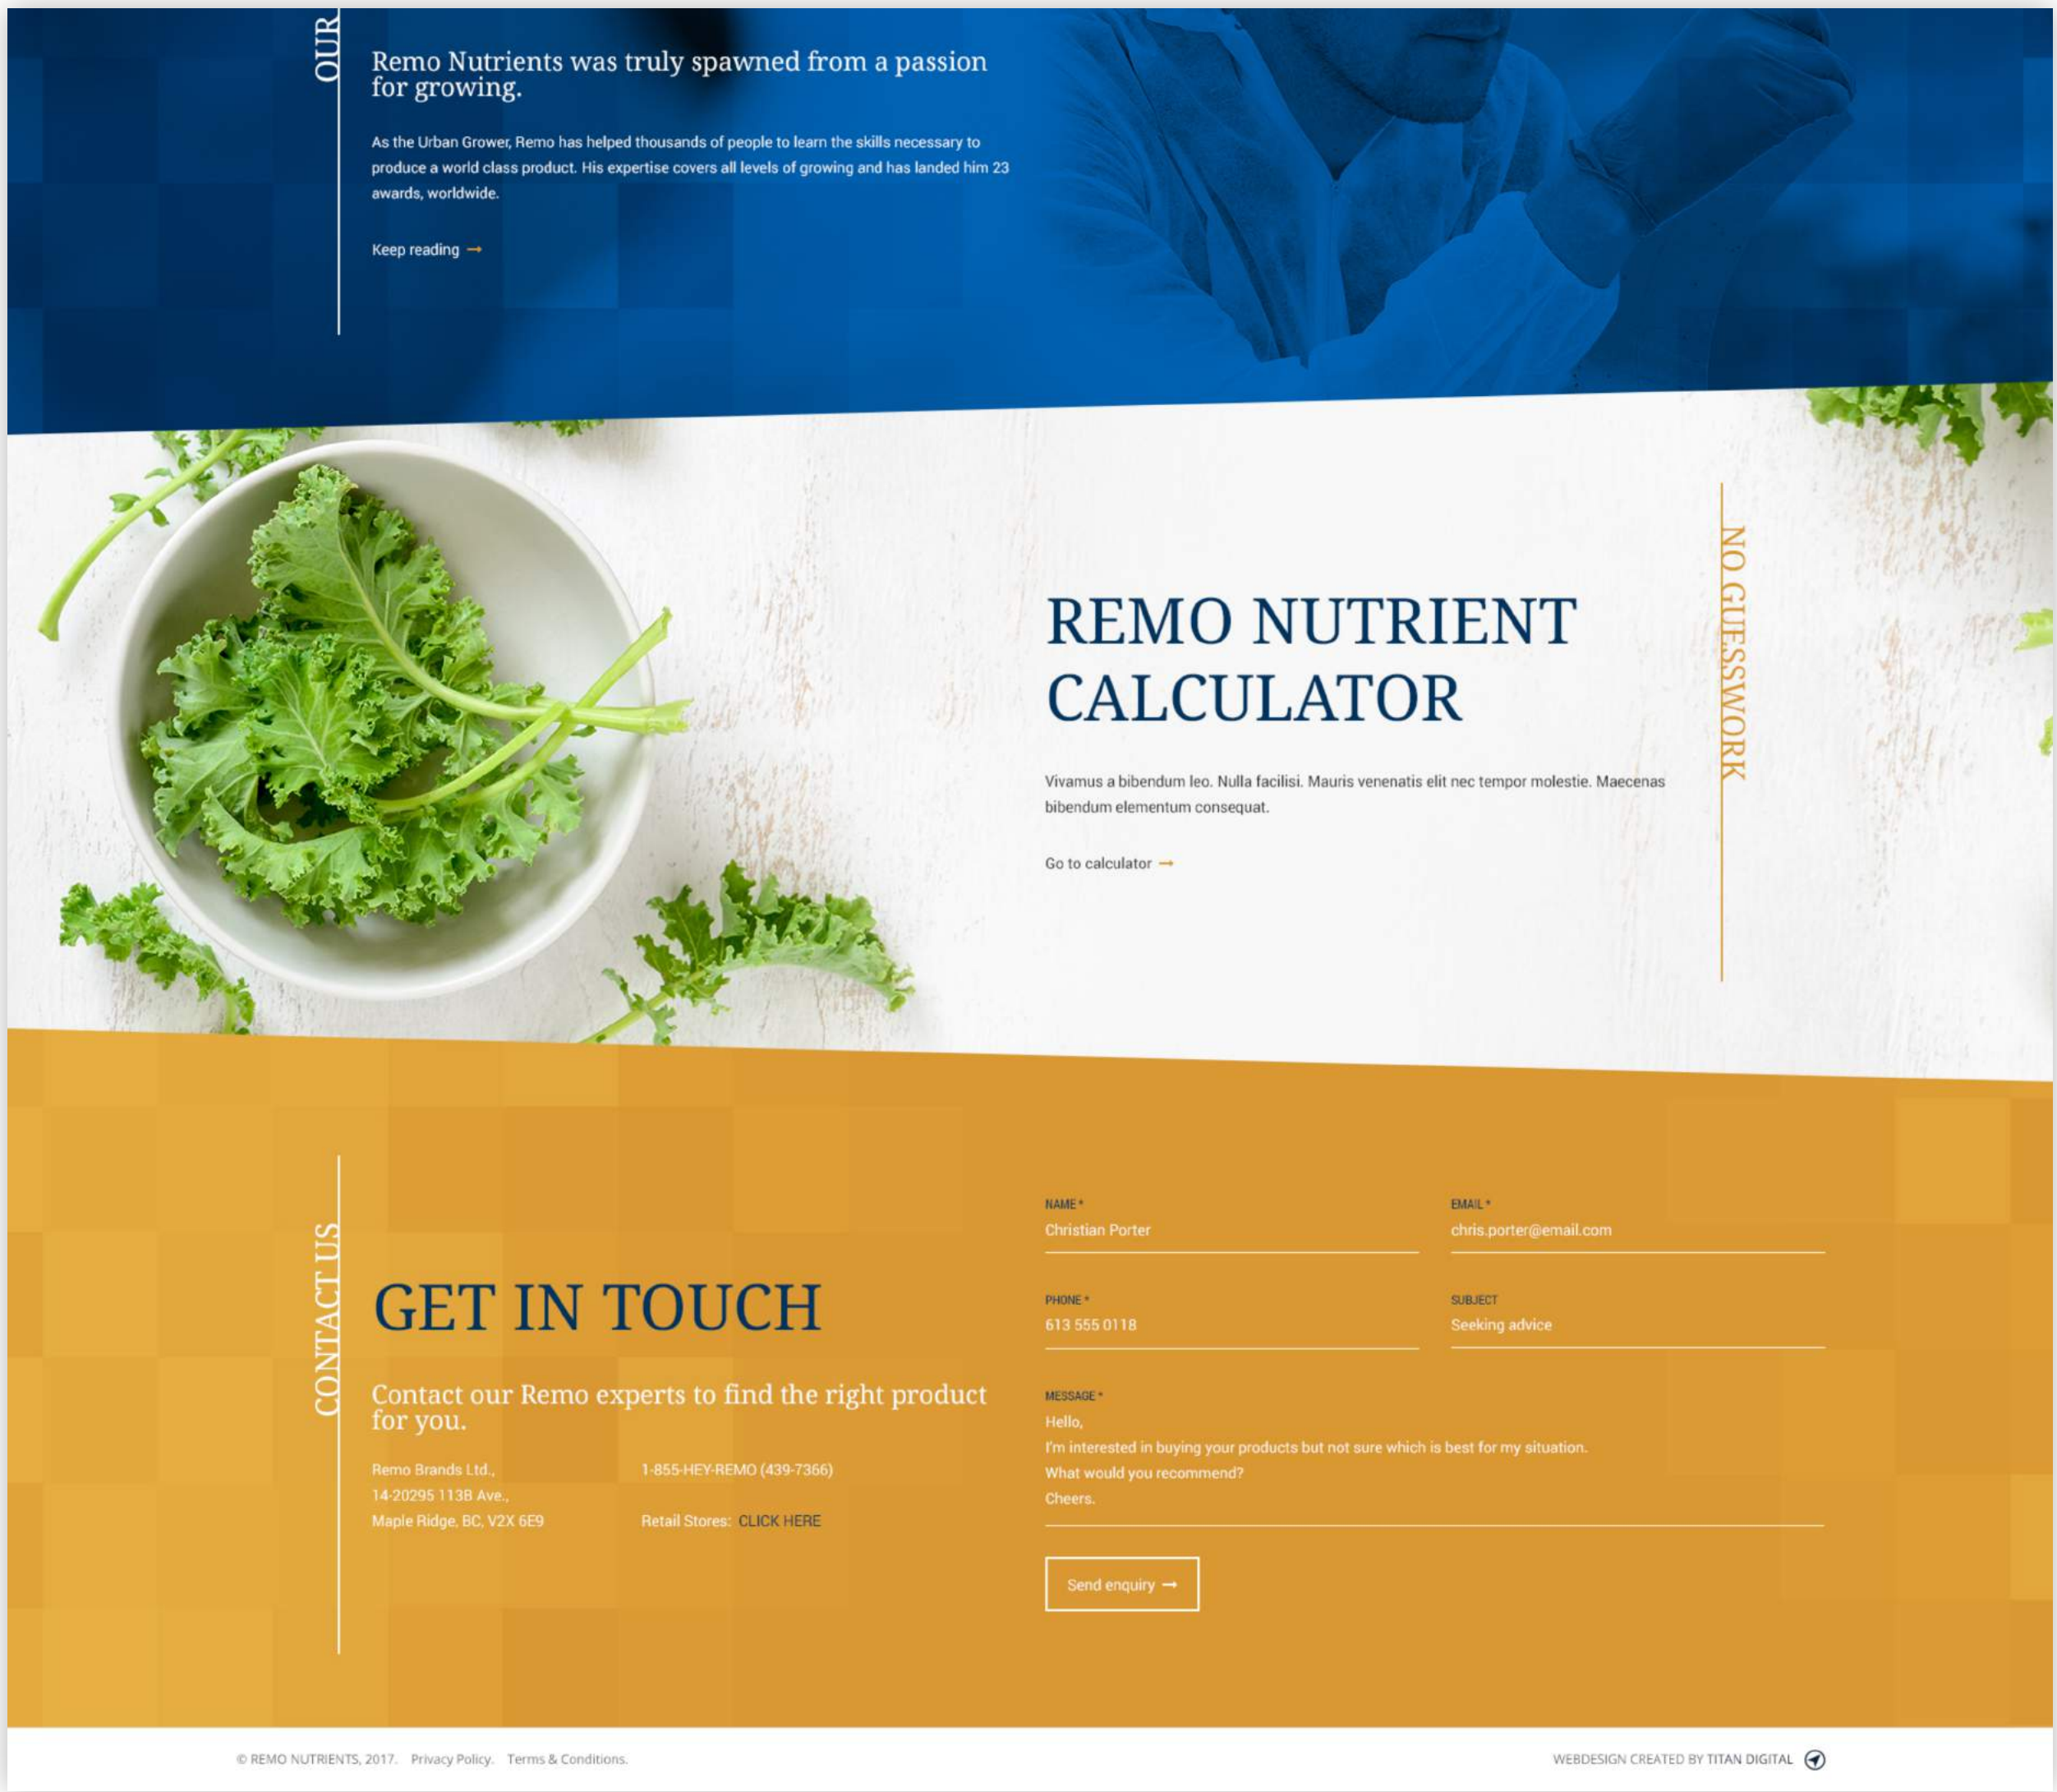

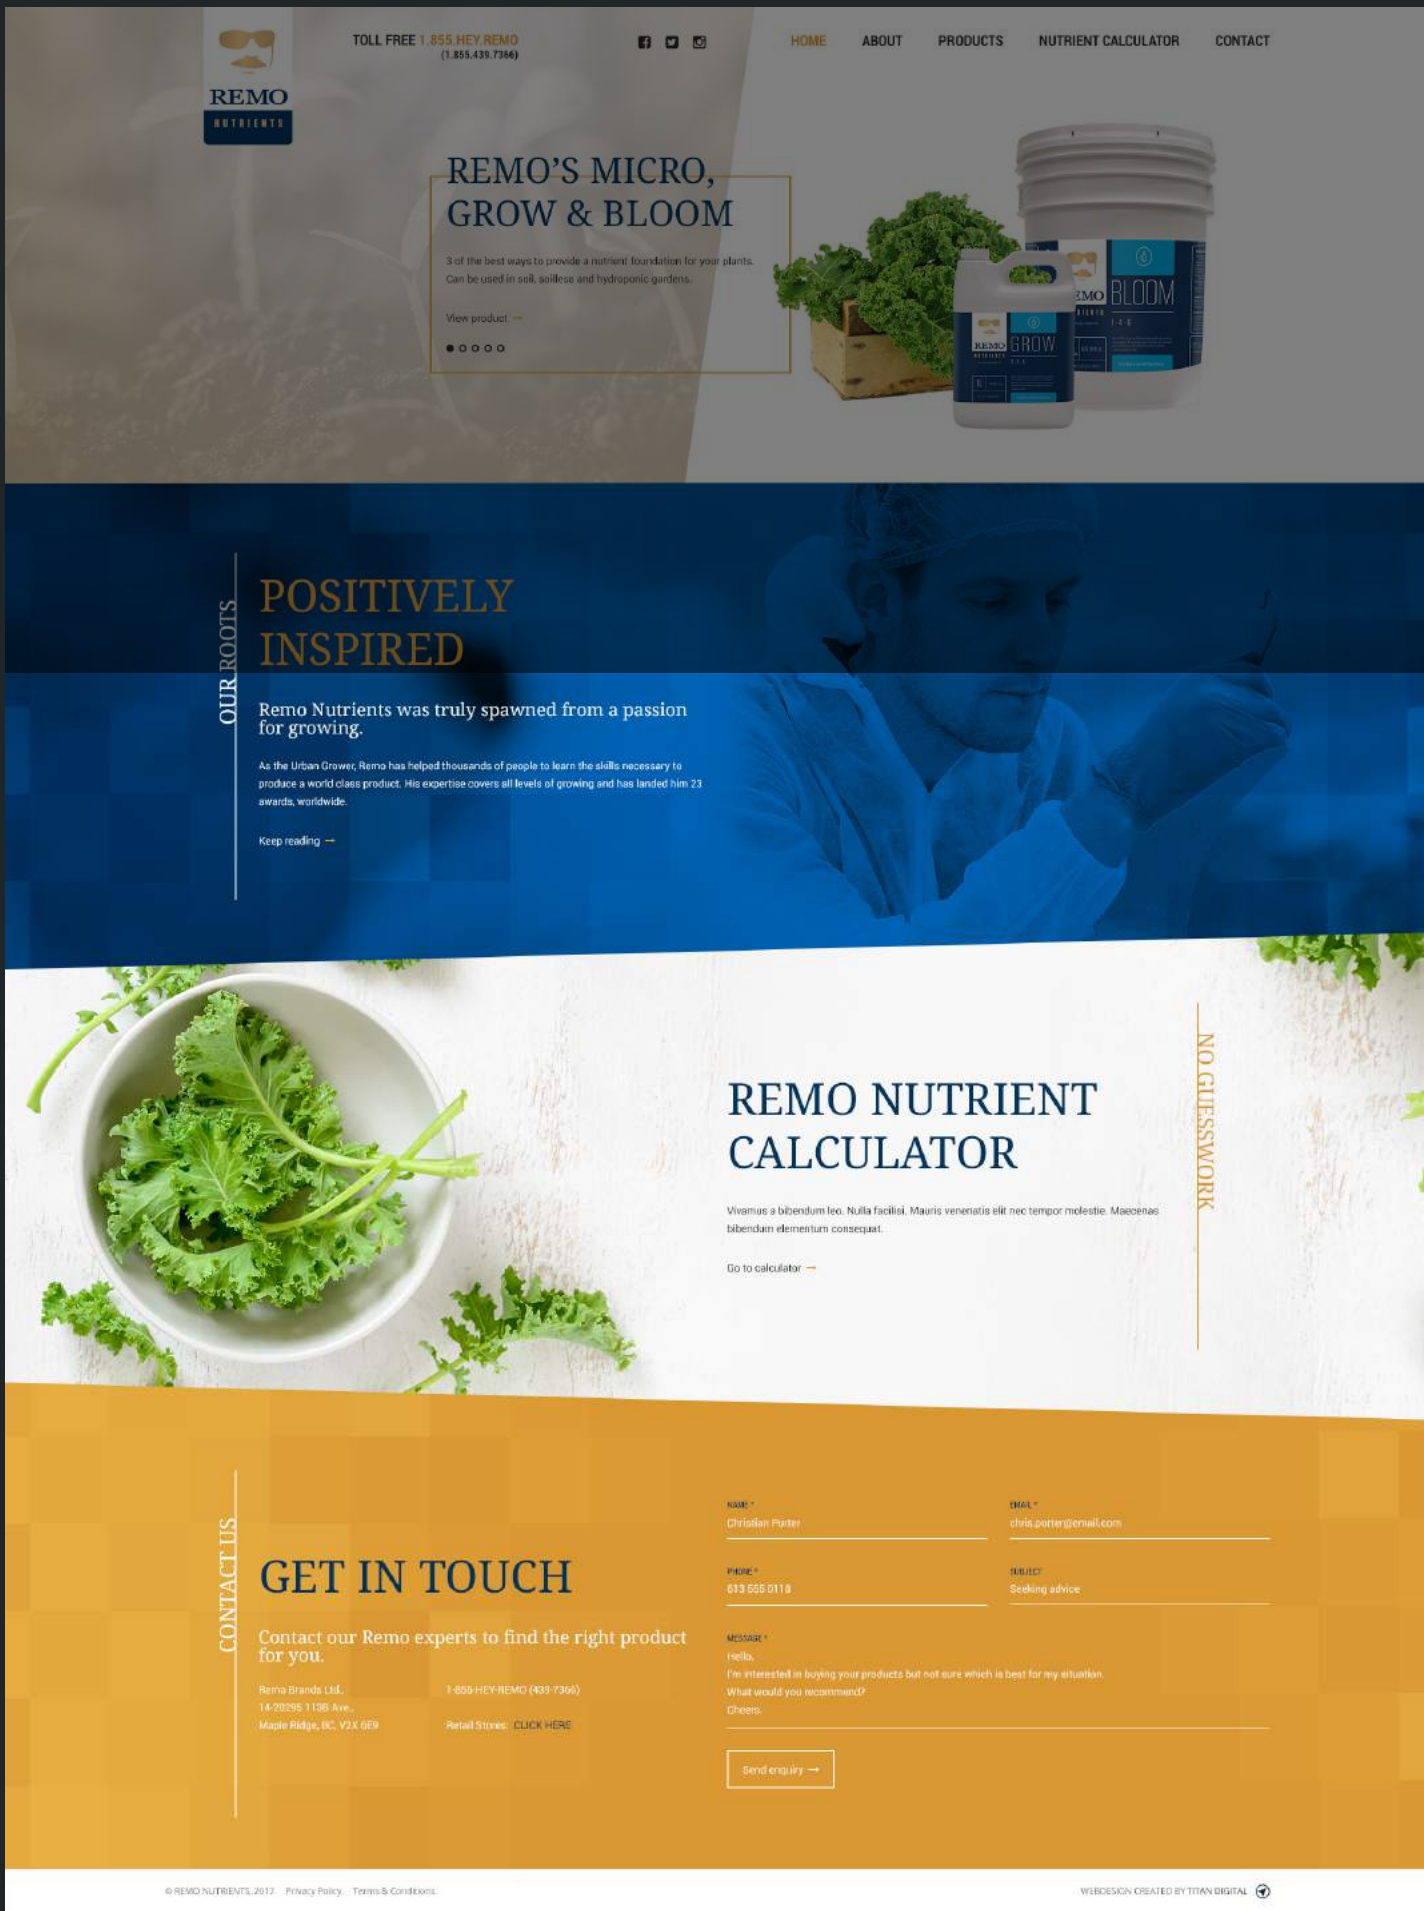

Hello,
I'm interested in buying your products but not sure which is best for my situation.
What would you recommend?
Cheers.

Remo Nutrients

UI Design

Created as a conceptual design, Remo Nutrients offer nutritional formula to encourage healthy plant growth. The concept design incorporates both natural and scientific inspirations to portray both aspects of their products.

Armada Construction Group

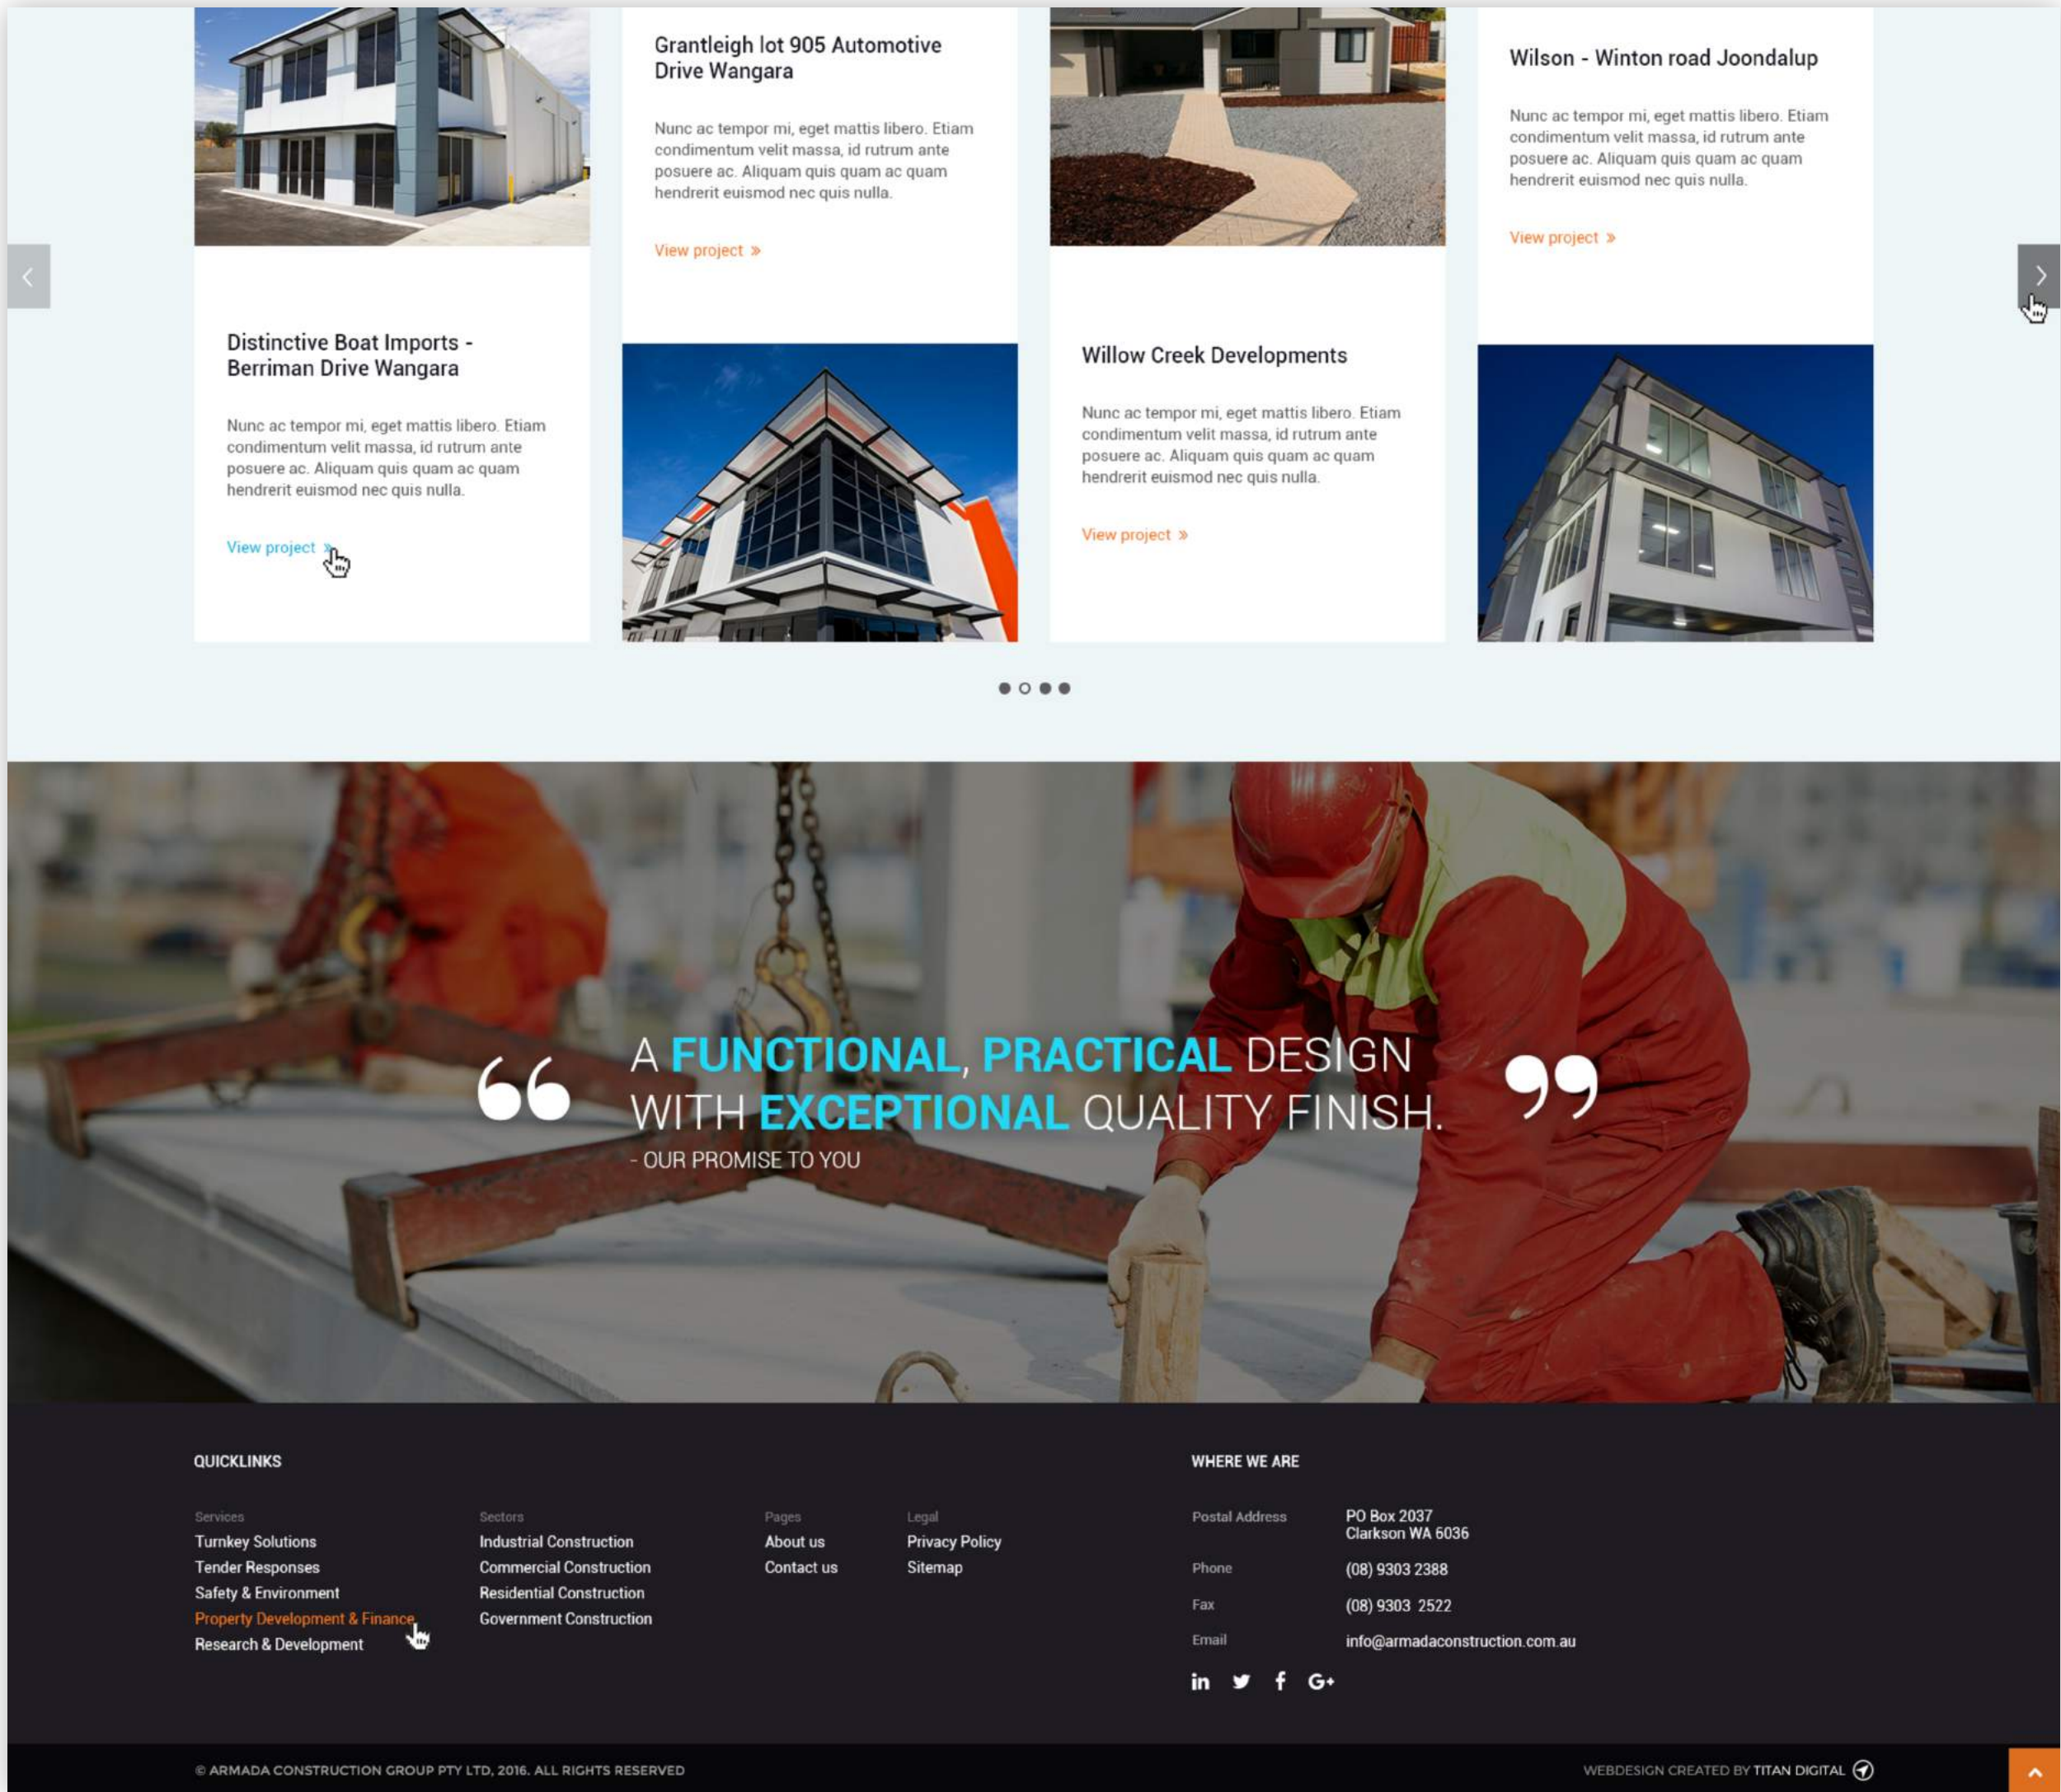

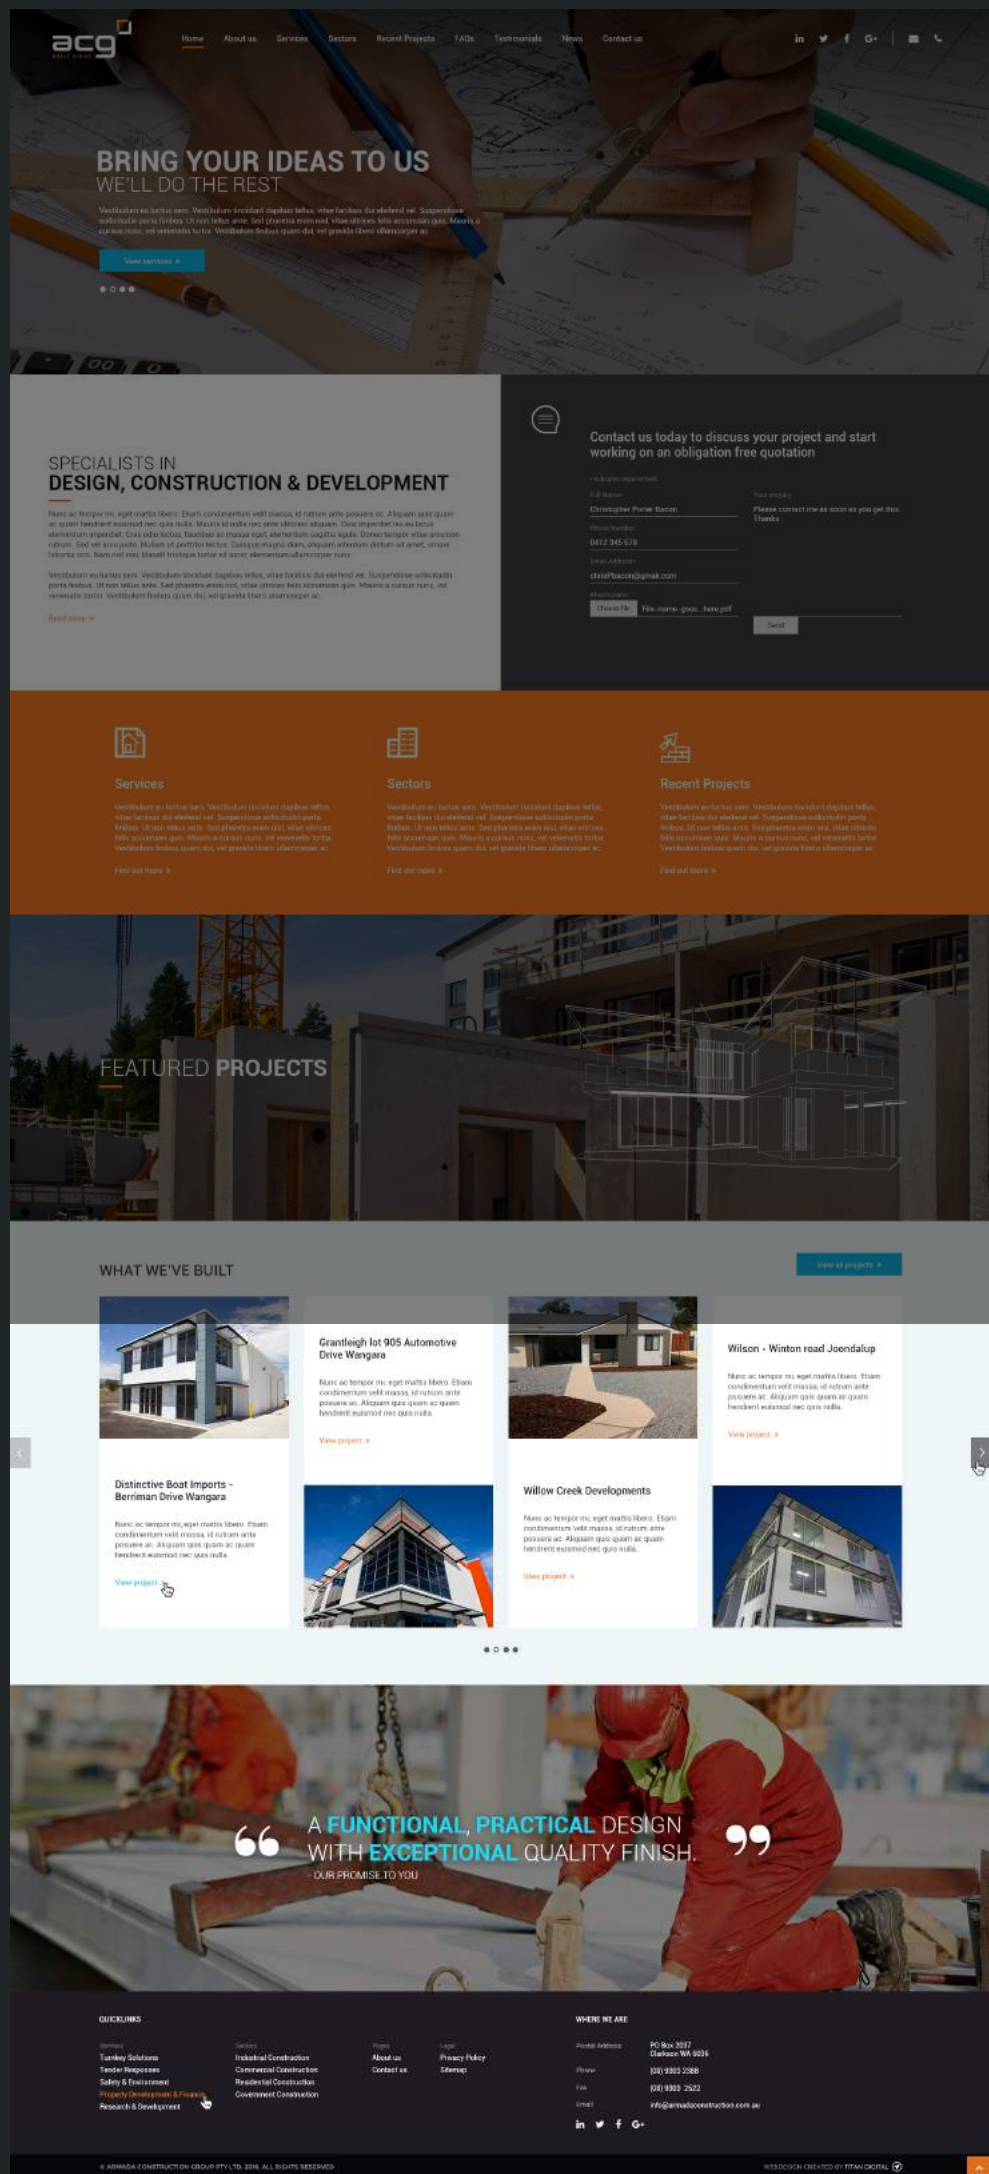

UI Design

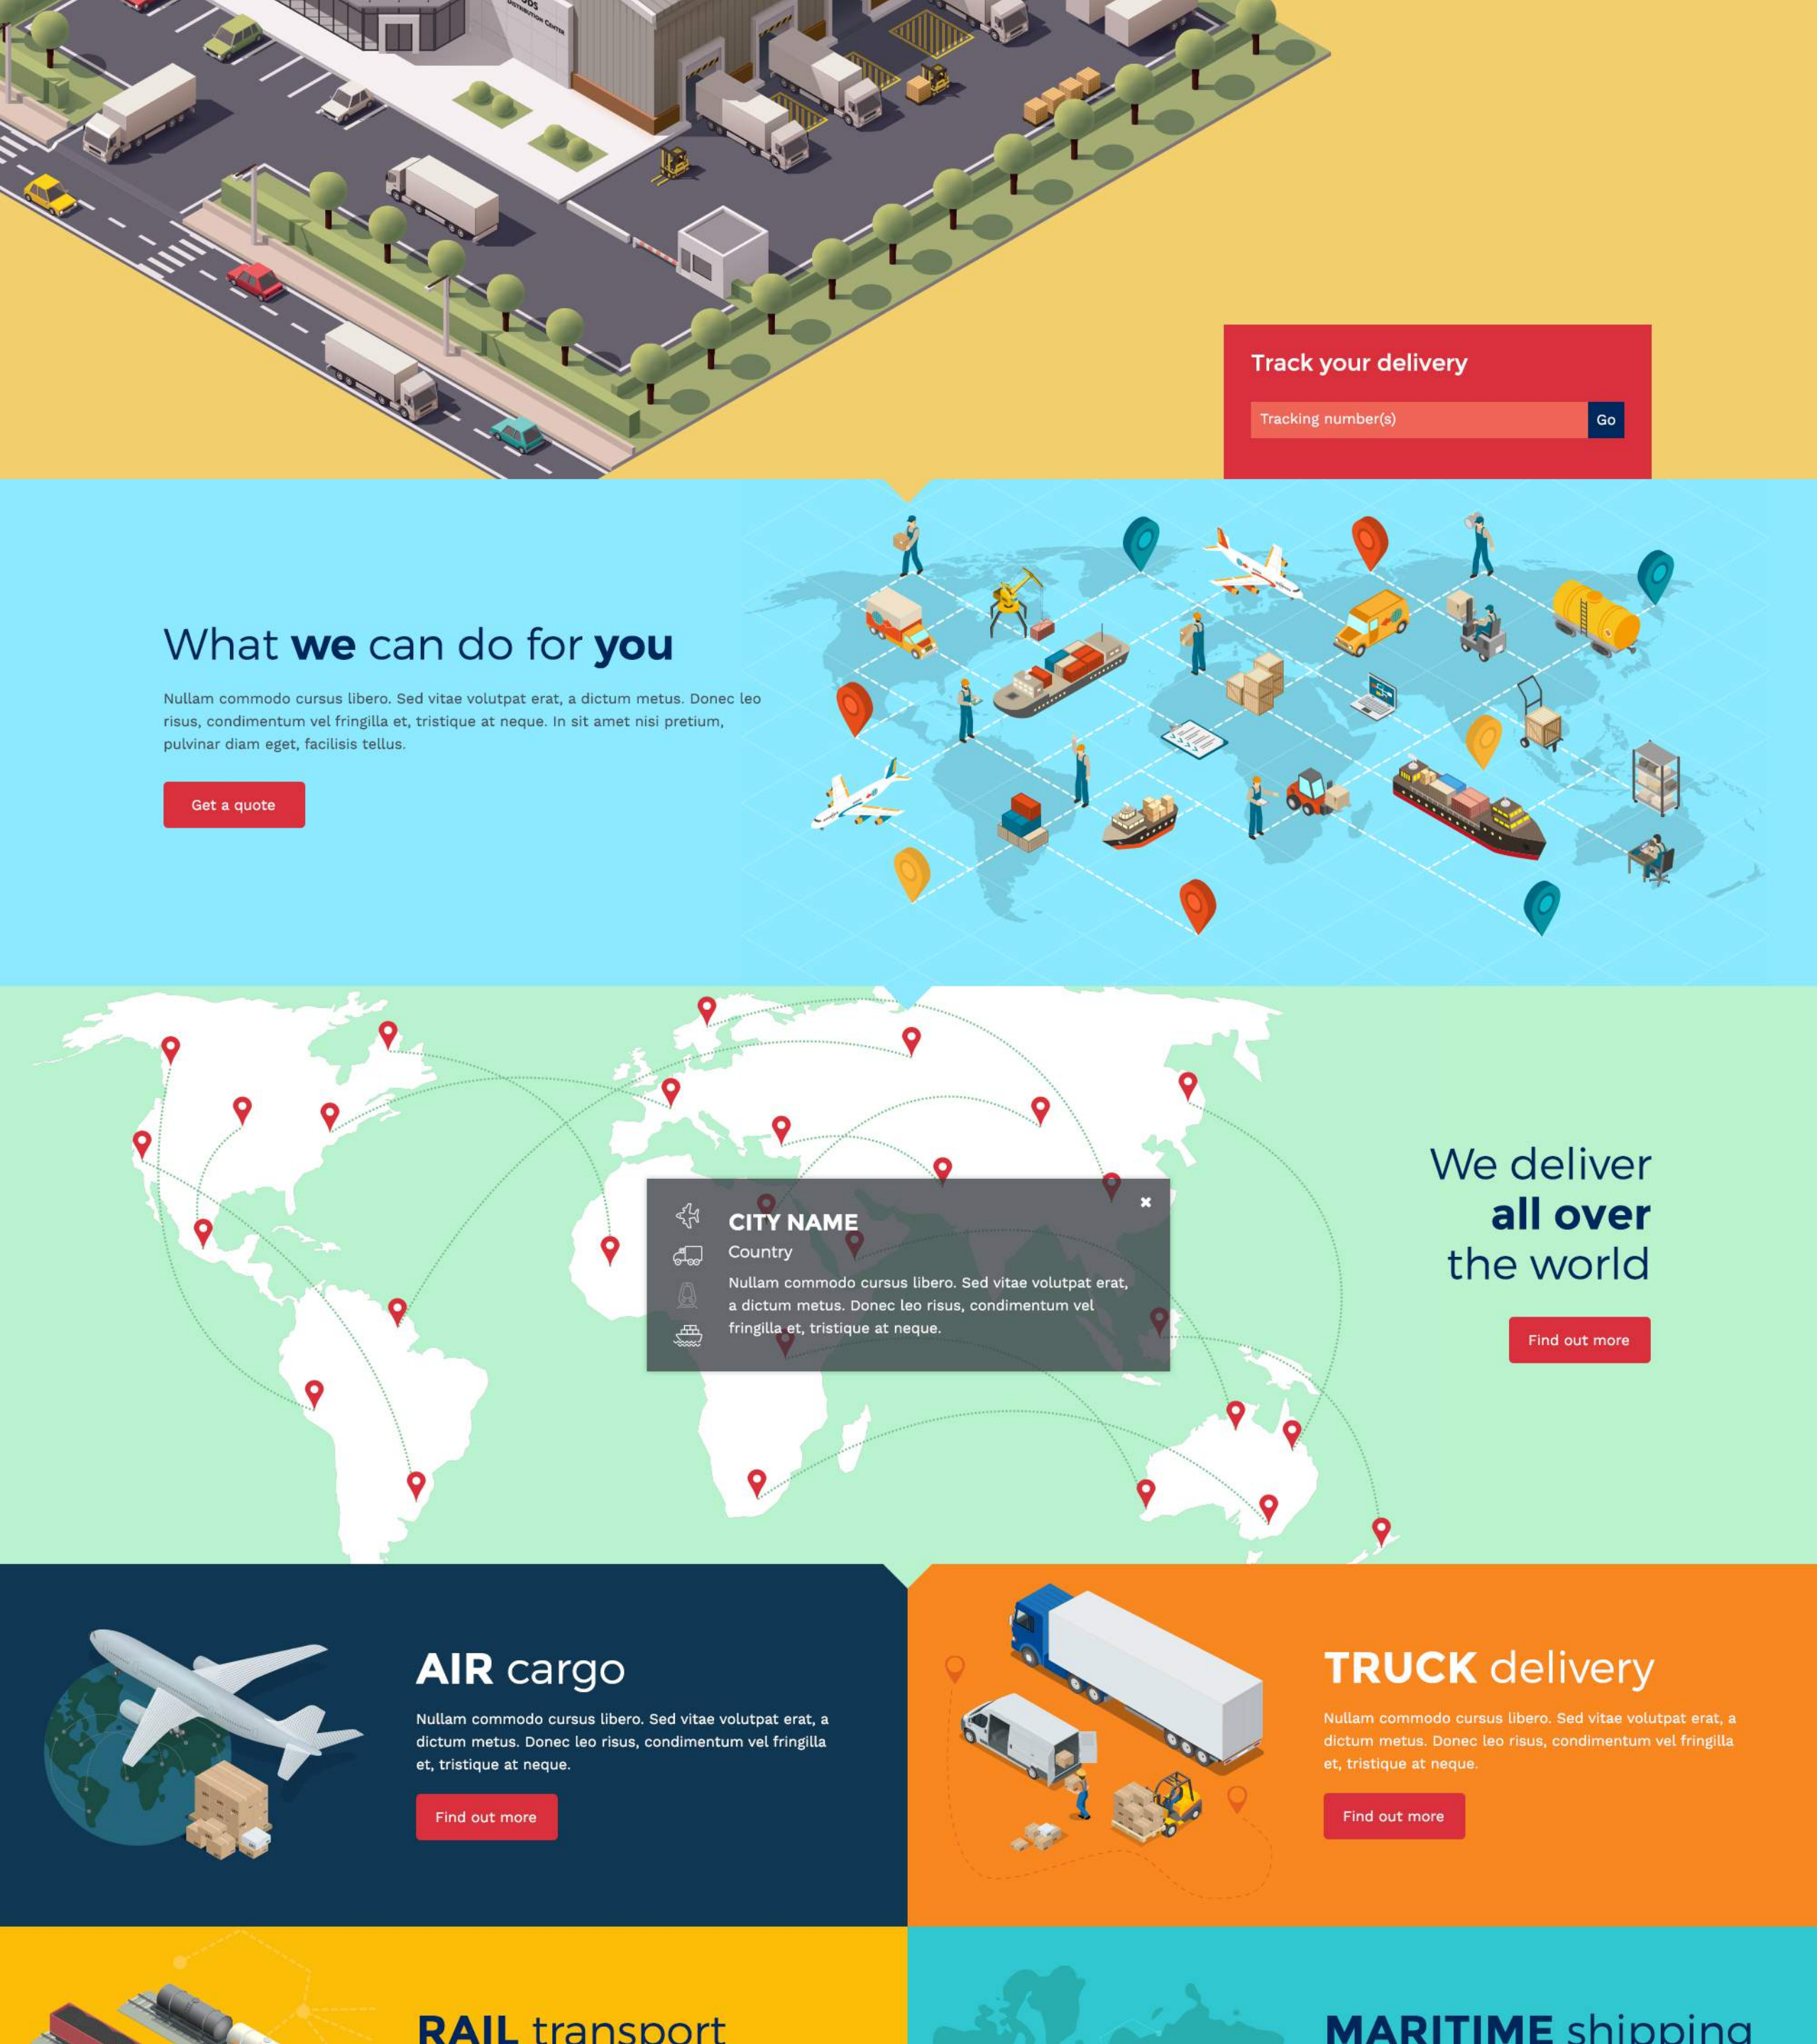

Armada Construction Group underwent a rebrand and required a new website to match their new look. The main orange from their logo was brought across while a complementary blue was used for call-to-action buttons. Parallax banner images were added through the homepage design to showcase their photos and act as section headings.

Created together with Titan Digital.

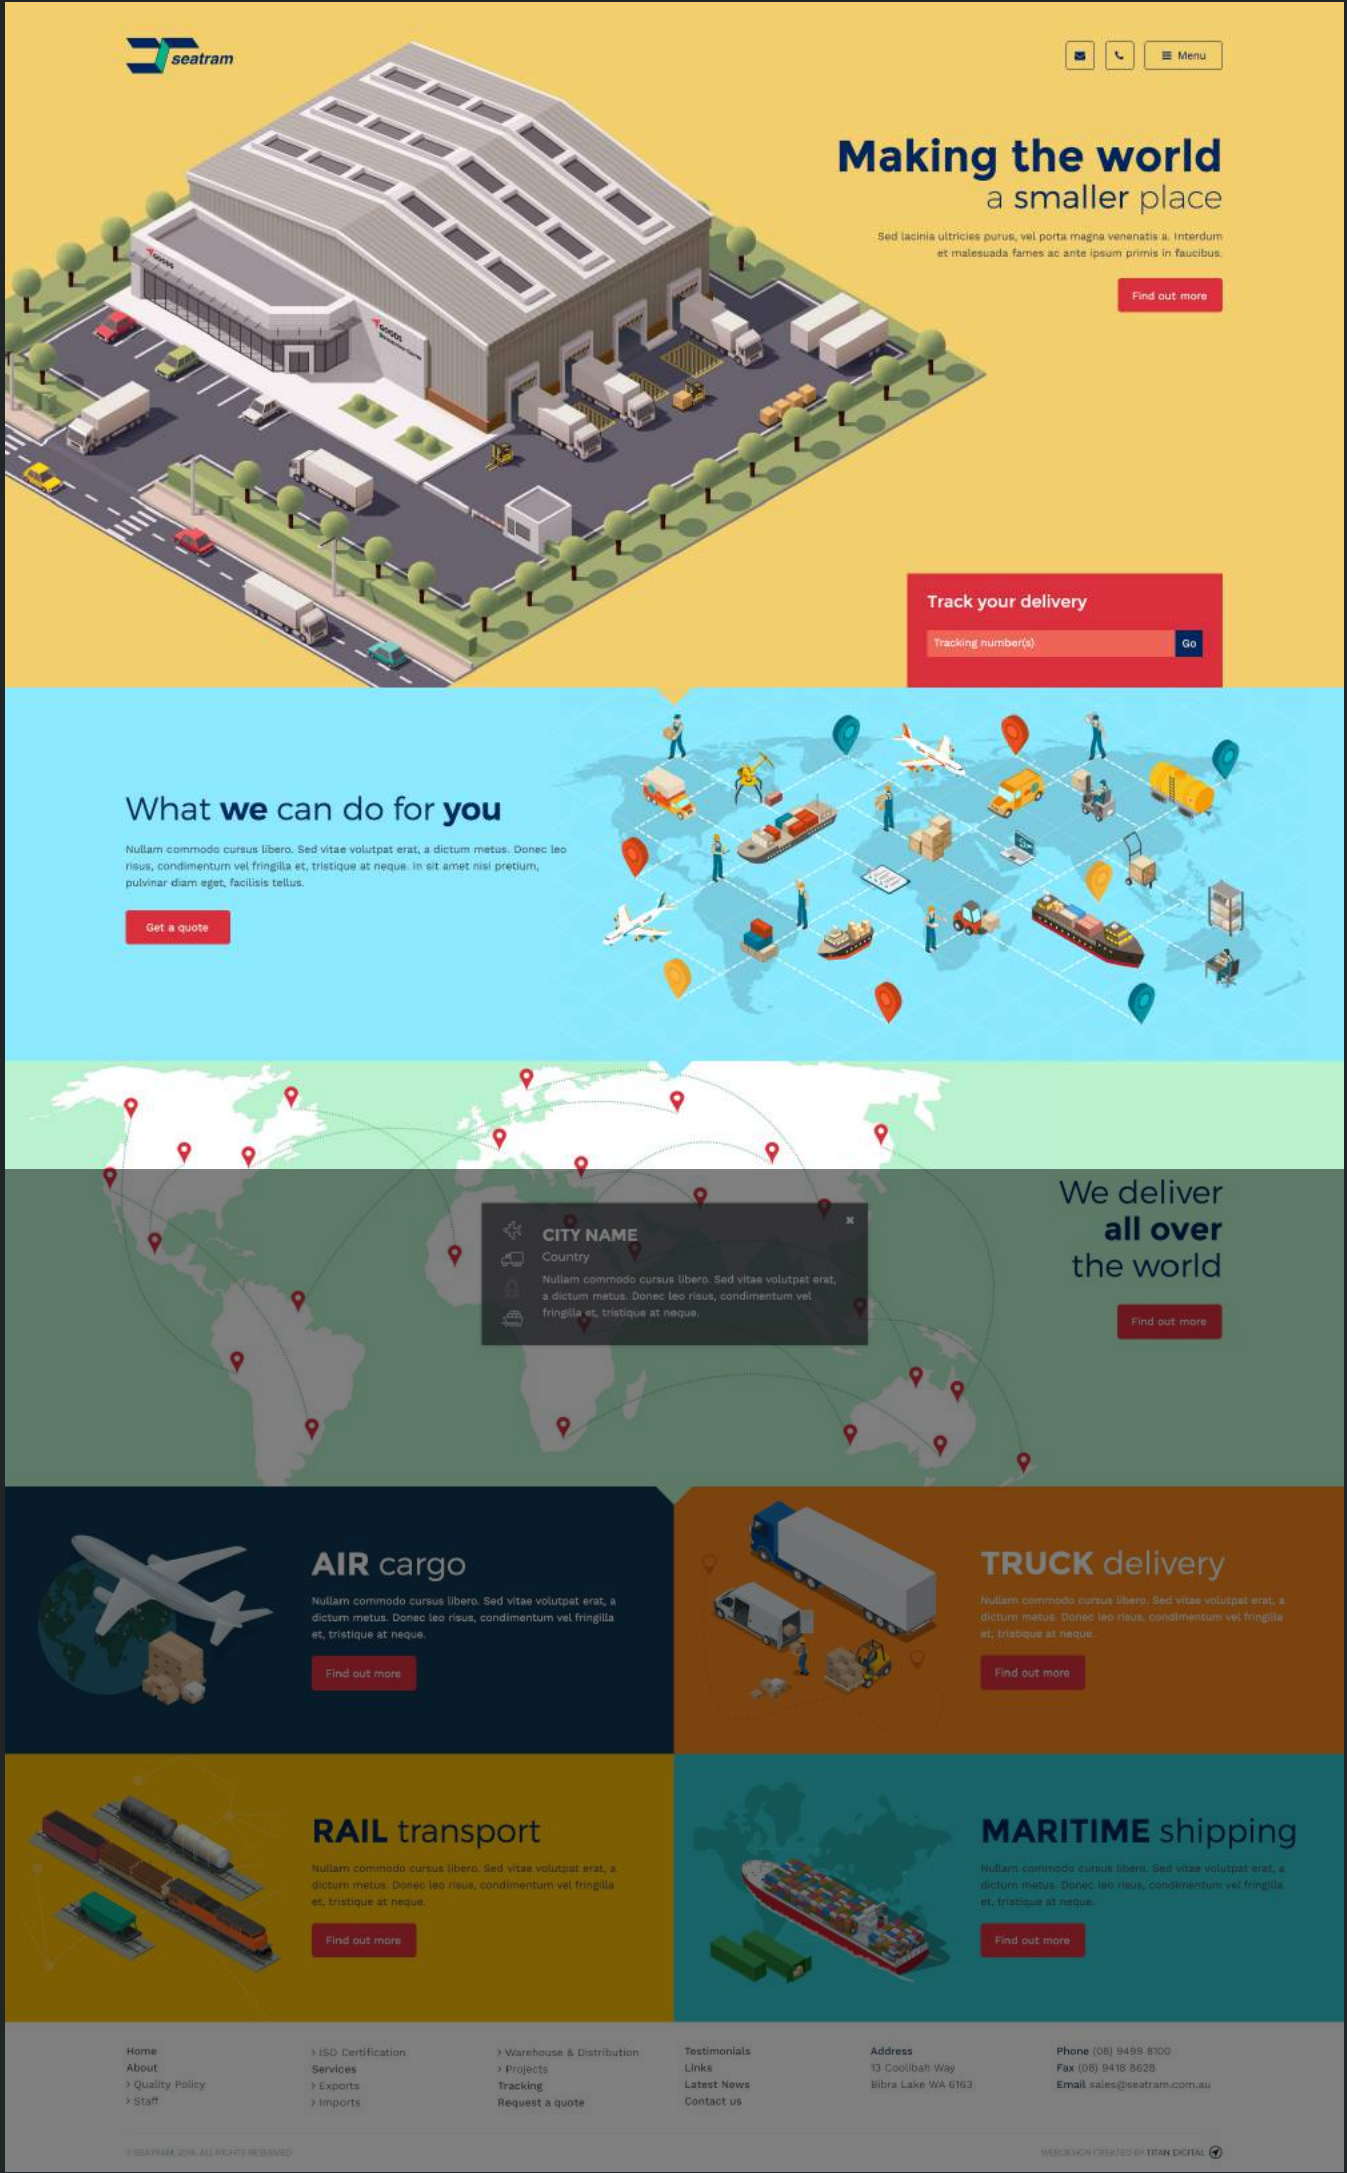

Seatram

UI Design

Created as a conceptual design, Seatram's tagline "making the world a smaller place" inspired the isometric imagery used throughout the design. The colours of each section make this shipping company stand out above the rest with their modern design and fun illustrations.

Created together with Titan Digital.

Making the world a smaller place
